

PHILIPS

7" round

LED Headlamp

LED01X1

Dual beam system

DOT compliant

LED01X1

50x Longer life

First to market with street-legal exterior LEDs

Philips LED Headlamps feature our advanced LUXEON Altilon LEDs. This innovative technology delivers powerful, precise illumination and bright white 5600 K light output that's closer to the color temperature of daylight.

Brighter, whiter light output

- High-Power Luxeon® Altilon LEDs

Dual beam system

- Split-lamp with a low beam and high beam

Extremely impact resistant

- Military-grade die-cast aluminium housing

LED Headlamp

7" round

LED01X1

Highlights

Brighter, whiter light output

Philips LED Headlamps feature our advanced LUXEON Altilon LEDs. This innovative technology delivers powerful, precise illumination and bright white 5600 K light output that's closer to the color temperature of daylight, while dramatically improving overall nighttime visibility

Dual beam system

The split-lamp low beam and high beam offers a unique look, when on and off. In addition, the complex reflector design optimizes and evenly distributes for the best visibility and pattern.

Extremely impact resistant

Unlike your traditional headlamp, the Philips LED Headlamp is bulb-free and electronics are encapsulated in hardened epoxy to resist damage caused by shock and vibration. The LED Headlamp features a military-grade die cast aluminium housing and an impact-resistant polycarbonate lens. The 'split-lamp' appearance offers a unique look when on and off, and their ultra-rugged construction make these LED headlamps ready for tough conditions - on road or off.

Specifications

Marketing specifications

Expected benefits: High-Performance LEDs

Product highlight: 12 year-lifespan, 5x time more light, road legal LED

Product description

Application: Headlight

Color temperature: 5600

Designation: Philips LED Headlamp

Light source: 2 LED Arrays

Range: LED Headlamp

Replaces: 6014, 6015, 6016, H6024

Type: 7" round

Technical specifications

Voltage: 12 V
