Safety has never been so attractive

Intense white Xenon effect

Philips WhiteVision lights add an intense white Xenon look to your car headlights for a premium driving experience at night. The increased brightness with 60% whiter light makes WhiteVision the perfect combination of style and safety.

Maximum visibility, premium look

- A premium driving experience with intense white Xenon effect
- Crisp beam with intense white light

Maximum white light for greater contrast

- Up to 60% more vision to maximise clarity
- Best-in-class lifetime for extended driving pleasure
- Greater contrast for improved visibility and safer driving
- White Xenon effect for a high-end look

100% more vision on the road

- Philips is the choice of major car manufacturers
- Philips car lamps are highly resistant

Highlights

A premium driving experience

Outperforming any blue car bulbs on the market, Philips WhiteVision headlights are the right choice for drivers who want to drive with style without compromising on safety. With a high colour temperature and a stylish white cap, WhiteVision is the ultimate upgrade for your headlamps. The Philips-patented third generation coating technology is an evolutionary masterpiece making WhiteVision the first headlamp with a truly white light.

Crisp white beam

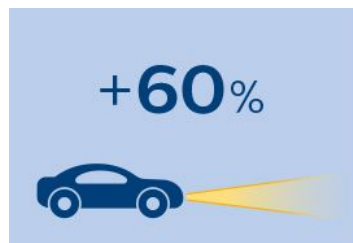

With up to 3700 Kelvin and an intense white light, Philips WhiteVision headlights illuminate the road ahead with a crisp white beam that eliminates darkness instantly. The premium beam for a premium driving experience.

White Xenon effect

WhiteVision gives your car lights the premium look of high-end cars.

60% more vision on the road

A longer beam pattern with 60% more vision enables you to see other road users more clearly. It improves safety, giving you more time to react to potential hazards on the road ahead.

Greater contrast, safer drive

Maximum white light with a colour temperature of up to 3700 Kelvin means your headlights give better reflections from road markings and signs. Whiter light keeps you alert at night, so you can enjoy a more comfortable driving experience.

Best-in-class lifetime

Philips WhiteVision headlights (available in H1, H3, H4, H7, T4W and W5W) are designed to last. They offer you a long and reliable lifetime of up to 450 hours*. That's significantly higher than competitive offerings. This results in fewer replacements and more value for money. (*H4 and H7 tested at 13.2 V standard voltage)

The car manufacturers' choice

For 100 years, Philips has been at the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

High quality, high resistance

UV-Quartz glass is stronger than hard glass and highly resistant to extreme temperatures and vibrations, which eliminates the risk of early failure. Philips UV-Quartz glass car lamps allow more pressure inside the lamp to produce a more powerful light and extended lifetime.

Specifications

Product description

Technology: Halogen
Type: H11
Range: WhiteVision
Application: High beam, Low beam
Homologation ECE
Base: PGJ19-2
Designation: H11 12362 WHV 12 V 55 W PGJ19-2
Voltage: 12 V
Wattage: 55 W

Light characteristics

Colour temperature: Up to 3700 K
Lumens: 1350+/-10%

Lifetime

Life time: Up to 400 h

Ordering information

Order entry: 12362WHVB1
Ordering code: 37469830

Packaging Data

EAN1: 8727900374698
EAN3: 8727900374704
Packaging type: B1

Packed product information

Pack Quantity: 1
MOQ (for professionals): 10
Gross weight per piece: 1 g
Height: 12.9 cm
Length: 9.5 cm
Width: 3.6 cm
Net weight: 43.6 g

Outer pack information

Net weight per piece: 0.2 g
