

FUSE

Pair 8" (200mm) Passive Subwoofer Enclosures

The Holy Grail of In vehicle Bass Solutions.

JBL Fuse vertical docked twin passive 8" subwoofer enclosures features versatile placement options, it can either be mounted as a single vertical enclosure or can be split apart and mounted as two separate enclosures underseat or in the rear of a hatchback. JBL Fuse delivers powerful bass and makes a great upgrade to factory or aftermarket systems that are screaming for that extra kick.

Features

- ▶ Versatile placement options
- ▶ More bass, less space
- ▶ Tuned to rock
- ▶ Killer cosmetics

Features and Benefits

Versatile placement options

JBL Fuse can be either vertical dock installed under package shelf locations or installed separately underseat.

More bass, less space

JBL Fuse is compact and very shallow allowing it to be mounted in virtually any vehicle even underseat.

Tuned to rock

In order to play low with minimal power input requirements, the Fuse is loaded with a 8" subwoofer and a passive radiator.

Killer cosmetics

Great curve plastic casing and symmetrical design combine to give Fuse great looks. A strong, attractive metal grille protects the woofer cone from damage, and the flush-mount spring-loaded terminals make connecting large-gauge wire a snap.

What's in the box:
