

ALWAYZAIRE™

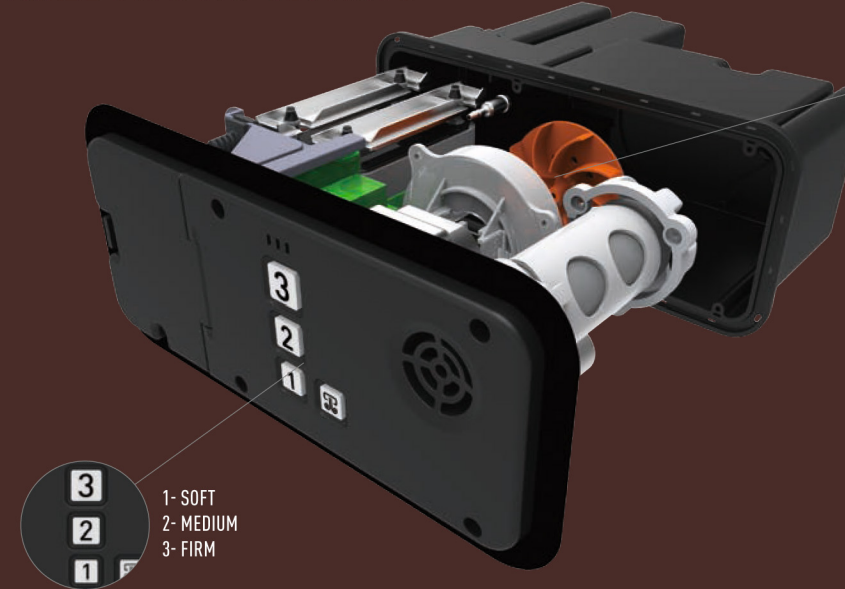

Our Dual Pump technology system, **AlwaysAire™**, encompasses a patented computerized PSI (pounds per square inch) sensor, allowing consumers to automatically inflate their air mattress to three varying preset PSI settings. This innovative technology recognizes any drop in the bed's internal pressure, triggering the silent pump to inflate the bed back to the consumer's desired setting. Consumers can literally rest easily, knowing they will have a wonderful night's sleep and wake up rested on a mattress that has not deflated overnight - it will Alwaysz have Aire in it! Once the mattress is no longer needed, the auto-deflate function is a simple press of the button and will shut itself off once the internal PSI reaches zero.

Bestway

It will Alwaysz have Aire in it!

THREE COMFORT SETTINGS

INTERNAL MOTOR
Silently turns on to maintain desired setting

1- SOFT
2- MEDIUM
3- FIRM

- Dual pump system with patented computerized PSI sensor that allows consumers to automatically inflate the bed to 3 preset PSI settings
- PSI sensor can detect drops in internal pressure and will automatically start the silent re-inflation pump to get the bed back to its intended firmness setting
- Auto deflation function will allow the bed to deflate without any user hassle. The deflation pump will automatically shut off once the internal PSI reaches 0.
