

Philips
DVD player

DVP3850G/05

Enjoy it all — from DVD or USB

with wireless game pad and 30 games

Your dream player with flawless, true-to-life picture quality and the ability to play virtually any disc! The Philips DVD player delivers your movies and music entertainment experience.

Benefits

Play all your movies and music

- Play CD, (S)VCD, DVD, DVD+- R/RW, DivX, MP3, WMA, JPEG
- DivX Ultra Certified for enhanced DivX video playback

Game-ready for extra fun

- Games CD provided for instant fun
- Wireless game pad for hassle-free fun

Bring audio and video to life

- Progressive Scan component video for optimised image quality

- 12-bit/108 MHz video processing for sharp and natural images

Connect and enjoy multiple sources

- USB Media Link for media playback from USB flash drives

Easy to use

- One-touch MP3 creation directly from CDs onto USB sticks

Features

Multimedia DivX

PHILIPS

USB Media Link

The Universal Serial Bus, or USB, is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. With USB Media Link, all you have to do is plug in your USB device, select the movie, music or photo and play away.

Games CD

This player comes pre-packed with a bonus games CD for extra fun. Just put a game CD in the disk drive and start having added enjoyment on the go.

Wireless game pad

Unlike other game consoles that use cables, this player comes with an infrared, wireless game console to free you up and let you enjoy hours of hassle-free fun.

DivX Ultra Certified

With DivX support, you are able to enjoy DivX encoded videos and movies from the Internet, including purchased Hollywood films, in the comfort of your living room. The DivX media format is an MPEG-4-based video compression technology that enables you to save large files like movies, trailers and music videos on media like CD-R/RW and DVD recordable disc for playback on your DivX Ultra Certified Philips Blu-ray or DVD player. DivX Ultra combines DivX playback with great features like integrated subtitles, multiple audio languages, multiple tracks and menus in one convenient file format.

Progressive Scan

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, it writes both fields at the same time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.

Picture/Display

D/A converter	12-bit, 108 MHz
Picture enhancement	Video upsampling

Sound

D/A converter	24-bit, 192 kHz
Frequency response	30-20,000 Hz
Signal to noise ratio	> 100 dB

12-bit/108 MHz video processing

12-bit Video DAC is a superior Digital-to-Analogue Converter that preserves every detail of the authentic picture quality. It shows subtle shades and smoother graduation of colours, resulting in a more vibrant and natural picture. The limitations of the standard 10-bit DAC become particularly apparent when it is used with large screens and projectors.

One-touch MP3 creation

Convert the contents of your favourite CDs to MP3 files on your Philips product and store them directly on a thumb drive or on your portable media player through a USB cable. Enjoy the convenience of creating MP3 files right in your living room, without a PC and even while the CD is playing.

Distortion and Noise (1 kHz)	> 85 dB
Crosstalk (1 kHz)	> 100 dB
Dynamic Range (1 kHz)	> 90 dB
Sound System	Dolby Digital
