### Getting Started

Your Ci25m Notebook Optical Mouse provides unrivaled precision and convenience.

#### Connecting to a USB-Compatible Computer:

1. Turn on your computer.
2. Insert the USB connector into the USB port. The mouse will automatically be recognized by your computer.

### Extending/Retracting the Mouse Cable

Hold the two ends of the connector and pull lightly. Please don't hold the retractable mechanism and pull.

**Note:** If the cable becomes tangled in the retractable mechanism simply slide mechanism to the center of the cable. Pull lightly on both ends of the cable and the cable will retract.

### Programming Your Mouse (Optional)

You may program your mouse buttons by downloading the latest version of MouseWorks® software available at [www.software.kensington.com](http://www.software.kensington.com). The install is optional; your mouse will function without installing the software.

### Common Troubleshooting Steps

1. Unplug and re-plug the mouse.
2. Test the device on another USB port or computer.
3. Some surfaces may “trick” the optical sensor, such as reflective surfaces like glass or mirrors. The optical sensor should perform well on all other surfaces.

### Important: Computer User Health Information

In recent years, medical attention on occupational injuries has identified normal, seemingly harmless activities as a potential cause of a wide range of problems collectively known as Repetitive Stress Injuries (RSI) or Cumulative Trauma Disorders (CTD). It is now recognized that any repetitive motion may contribute to these health problems. As a computer user, you might also be at risk. By paying attention to the way you perform your work, use your computer and phone, play sports, and work around the house, you can identify the behaviors that may be putting you at risk. If you experience pain, swelling, numbness, or weakness in your wrists or hands (especially during sleep), see your physician immediately. These symptoms could mean that you are developing a repetitive stress injury that requires prompt medical attention. For more detailed information, consult your doctor.

### Contacting Kensington®

Federal Communications Commission Radio Frequency Interference Statement

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**SHIELDED CABLES:** In order to meet FCC requirements, all connections to equipment using a Kensington input device should be made using only the shielded cable provided.

**MODIFICATIONS:** Modifications not expressly approved by Kensington may void the user's authority to operate the device under FCC regulations and must not be made.

Declaration of Conformity Compliance Statement

This product complies with Part 15 of the FCC Rules. Operation is subject to two conditions: (1) This device may not cause harmful interference, and, (2) this device must accept any interference received, including interference that may cause undesired operation. As defined in Section 2.909 of the FCC Rules, the responsible party for this device is Kensington Computer Products Group, 333 Twin Dolphin Drive, CA 94065, USA.

This Class B digital apparatus complies with Candadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
