KETTLE

TTA-751-GS

TCM-1429B-GS

- Digital control with 5 temperature presets: 45/60/70/80/100°C
- Keep-warm function and white LED display on handle
- 1.7 L capacity with fast 2200 W concealed heating element
- Front-facing water window and push-button lid for easy use
- Stainless steel body with auto shut-off and boil-dry protection

Part of the Tornado Digital Line, the TKES-4173-GS is a smart stainless steel kettle made for precision, speed, and style. With five preset temperature settings (45/60/70/80/100°C), it delivers the perfect heat for everything from delicate teas and pour-over coffee to baby formula and instant soups. The intuitive LED display on the handle and touch-button control panel let you select the temperature with ease, while the keep-warm function maintains your selected heat for up to 60 minutes. Its 1.7-liter capacity, concealed 2200 W heating element, and boil-dry protection ensure fast, safe performance. A front-facing water window lets you monitor the fill level at a glance, and the push-button lid and 360° swivel base provide daily convenience. Finished in food-grade stainless steel, the TKES-4173-GS combines minimalist aesthetics with advanced features—perfect for modern, precision-focused kitchens.
