- Play films, photos and music directly from USB and SDHC drives

Easy to connect and enjoy

- Connect your own keyboard and mouse and explore the world
- Expand your storage with SDHC media
- USB Hub with four ports for easy connections
- SmartStand design features one-touch adjustment for easy use

PHILIPS

Highlights

Smart All-in-One

Open up a new world of opportunities with the Philips 23-inch Smart All-in-One powered by Android. Now you can enjoy streaming HD video and music, e-Learning, e-books, email and surf the web on its big Full HD screen. Just attach your keyboard and mouse to its built-in USB hub, connect to the web, and you are ready to go. The Google Play app store enables you to download your favourite apps. The VGA and HDMI connectors allow it to be also used as a fully functional computer monitor. With its versatile capabilities, this smart All-in-One can also be used in various business or educational environments

Google Play™ Store

Enjoy great applications from the Google Play™ Store. A single click on the app icon will take you to the store via Wi-Fi or Ethernet connection. Download and install apps for entertainment, games, utilities, office, photos, video, news, social network, etc., which are available and updated from the store. The clear, easy-to-use interface helps you to browse intuitively and can sort by rating, category or popularity.

16:9 Widescreen Full HD

The Smart All-in-One features a 16:9 Full HD (1920 x 1080 resolution) screen for a fully-immersive entertainment experience. It's fully future-proof as it supports 1080p signals from all sources, including the most recent Blu-ray and advanced HD game consoles. It produces brilliant flicker-free progressive scan pictures with superb brightness and colours.

Socialise with webcam

The integrated webcam, with superb, bright and crisp images, enables you to socialise with your family and friends as if you were face to face. The Smart All-in-One's ultra-sensitive microphone ensures that your voice carries through crisp and clear. You can hear clear audio either from its built in stereo speakers, or attach your own headphones for private conversations. This simple built-in solution is easy and ready to go at any time.

Superb stereo sound

Immerse yourself with the high quality built-in stereo speakers.

Expand your storage

Accommodate your ever growing library. You can expand your storage capacity by adding an

external SDHC card or USB flash drive using the built-in expansion slot.

Four Ports USB 2.0 HUB

A USB Hub allows you to conveniently connect and play multimedia devices such as USB memory devices, cameras, portable HDDs, web cameras, PDAs, printers and many other devices. The conveniently located USB 2.0 Hub on the monitor allows USB 2.0 signals to pass through to the computer for increased ease-of-use. Note that many devices like cameras and HDD may need to be powered independently, as they have higher power requirements than the monitor USB Hub can provide.

SmartStand

The Philips Smart All-in-One features a SmartStand with maximum recline adjustability and easy one-touch adjustment. The easy adjustment of the SmartStand enables you to use it in various ergonomic positions. With just under 60 degree recline position, you can now interact with the display naturally to touch and type, or you can use it in an upright position to sit and do some serious work.
