hp no.19 black inkjet print cartridge

The HP No.19 Black Inkjet Print Cartridge (c6628ae) has been specifically developed to work with HP Deskjets 350c and 350cbi, both of which are mobile printers designed for use with laptops PCs.

This is an important – and rapidly growing – market, and the No.19 ink cartridge has been developed to meet the particular needs of business travellers who will frequently be using their printers in different environments around the world and at high altitude on aircraft.

professional quality output whatever the environment

Changing temperatures and the different air pressures at altitude place particular demands on an ink cartridge. The No.19 black ink cartridge features a specially engineered ink containment system (the 'spring bag assembly') to cope with these varying conditions while still delivering professional quality printing, even on the plain paper that will be most readily to hand when users are on the move.

high performance... and easy identification

The No.19 cartridge enables business travellers to use their mobile printers wherever they are, but this level of versatility has not been at the expense of quality. The advanced pigment ink ensures crisp black text every time, even on everyday paper, and the HP RealLife Imaging System produces outputs that are always clear and always sharp. A 30 ml ink capacity delivers an average of 485 pages at 5% density.

In order to help users identify this cartridge quickly and easily, the cartridge cap on the HP No.19 has been specially colour-coded chocolate brown.

features

- designed to work with hp deskjet 350c and 350cbi printers
- spring bag assembly
- hp advanced pigment ink
- single drop-in/snap-out cartridge
- hp print quality and reliability
- hp reallife imaging system
- colour-coded cartridge cap

benefits

- provides a complete, reliable printing solution for users of mobile printers (i.e. regular business travellers)
- specially engineered ink containment system ensures reliable use at high altitude (i.e. on aeroplanes) and at varying temperatures
- delivers professional results on any paper – even everyday office paper
- clean, fast and easy with a single drop-in/snap-out black inkjet print cartridge
- genuine hp technology delivers results that are always clear and always sharp
- designed to work with hp printers and papers and films for consistently great results
- chocolate brown cartridge cap makes the no.19 cartridge easy and quick to identify

hp no.19 black inkjet print cartridge

frequently asked questions

what is the key benefit of the no.19 cartridge?

The HP No.19 black inkjet print cartridge has been designed for use in HP Deskjet 350C and 350CBi printers, products that are primarily used by mobile business people with professional-quality printing needs. This new inkjet print cartridge has been designed to perform at changing altitudes and temperatures to meet the demands of these users.

how does the no.19 cartridge work?

A new spring bag assembly provides more robust ink storage to help prevent ink leakage and ensure complete reliability at different altitudes and temperatures. This is critical to business travellers who will often need to work during flights and in different parts of the world.

how many pages will the hp no.19 cartridge print?

The actual number of pages depends on the ink coverage, but users can expect to be able to print approximately 485 pages at 5% density.

will other black cartridges work with these printers?

No, the HP No.19 black inkjet print cartridge is the only black inkjet print cartridge designed to work in the HP Deskjet 350C and 350CBi printers.

can tri-colour inkjet print cartridges be used in hp deskjets 350c and 350cbi?

Yes. Both these printers will accept either black or tri-colour cartridges so the No.19 black cartridge may be replaced with the HP No.49 tri-colour inkjet print cartridge for colour output. When not in use, the print cartridge should be stored in the humidior that comes with the printer.

product specifications

p/n	c6628ae
