

# COMFORT CELL TECH™

Using state-of-the-art polyester mesh materials to create advanced I-Beam and Y-Beam construction, Bestway airbeds deliver the comfortable, supportive sleep experience of a traditional mattress. In 2015, Bestway introduced Comfort Cell Tech™, an engineering innovative solution in portable sleep solutions. While standard PVC beams stretch under pressure, Bestway's Comfort Cells hold strong, maintaining their shape and integrity. These rigid fibers dramatically improve durability and comfort for an amazing night's sleep. Bestway's Comfort Cell Tech™ airbeds are so simple to use. And they are perfect at home or on the go!
