

Philips Humidification Filter

The activated carbon HEPA filter acts on ultrafine particles ,allergens ,bacteria , and viruses as well as wide spectrum of harmful gases including formaldehyde.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Packaging

- Cardboard: minimal of 75% recycled content
- No use of polyvinylchloride (PVC), extruded polystyrene (EPS) in packaging

Substances

- The product is free of PVC (excluding the power cord)
