

Wired Mini Optical Mouse

Model # PAUM010E

The Targus Wired Mini Optical Mouse is the ideal desktop mouse with a 3-button standard design plus scroller ensuring ease of use. The mouse requires no driver software or user setup and offers true plug and play. Its ergonomic ambidextrous design renders it comfortable for everyday desktop use. Unlike a traditional mouse, it uses an alternative optical sensor and digital signal processor to read and follow your mouse moves, eliminating erratic cursor movement. You can also use the "Screen-Scroller" wheel to scroll up and down and alternate between open applications.
