

Philips 2000B series  
Professional air purifier

CADR 260 P/ 178 F CCM P4/ F3

Removes 99.97% 0.3µm particles  
Removes 99.9% bacteria & virus  
Effective area: 18- 31 m2

AP2266/00

# Healthier Air, Always

Minimalized design, maximized protection

Unobtrusively delivers clean indoor air. With integrated allergen mode for round the clock protection. Ideally suited for the smallest spaces that require maximum concentration.

## Guaranteed protection

- Superior performance with VitaShield IPS
- GB/T certified performance on CADR and CCM
- Certified removal of bacteria and viruses
- Certified 'Allergy-friendly' by ECARF

## Continuous preformance

- Fan speeds for silent operation as well as maximum power
- Special auto mode is more effective for allergen removal
- Adjust light to suit your preference
- No tampering with lock mode

## Optional settings for professional environment

- Reassurance with optional real-time air quality feedback
- Know when it is time to replace the filter
- Turn on the power and turn on the purifier

# PHILIPS

## Professional air purifier

CADR 260 P/ 178 F CCM P4/ F3 Removes 99.97% 0.3µm particles, Removes 99.9% bacteria & virus, Effective area: 18- 31 m<sup>2</sup>

# Highlights

AP2266/00

### Allergy-friendly certification

Certified Allergy-friendly by the European Research Foundation (ECARF).

### CADR and CCM according to GB/T

With our professional NanoProtect filter series our air purifiers can deliver a Clean Air Delivery Rate (CADR) on particles of 260 m<sup>3</sup>/hr and on formaldehyde of 178 m<sup>3</sup>/hr. The GB/T standard also uses a 4-point grading scale called Cumulated Clean Mass (CCM) to establish the filter capacity on particles (P) and formaldehyde (F). In both scales our filter used in the 2000B series score the highest with P4 and F3 respectively.

### Certified air disinfection

Removes 99.9% of bacteria as certified by the Shanghai Institute of Measurement and Testing Technology (SIMT) and 99.9% of H1N1 virus as certified by Airmid.

### Light control

Different settings to control the light of the User Interface (UI) or the LED color ring.

### Lock mode

Avoid tampering with the settings by activating the lock mode on the purifier.

### Operates silently

The professional air purifier range has different fan speed settings. On AUTO mode the purifier will automatically adjust the fan speed to the required setting based on the AeraSense input. You can also manually adjust the speed for maximum cleaning capacity in a short amount of time or silent operation in a quiet environment.

### Optional auto restart function

Instead of turning every purifier on and off by hand Philips offers you the option to have the device switch on and off automatically when you switch the power in the room.

### Optional filter reminder

Our professional air purifiers come with an optional indicator function to remind you when it is necessary to replace the filters ensuring continuous optimal performance.

### Optional real-time feedback

Our air purifiers can provide a real-time air quality indication of the indoor air quality with a straightforward 4-color LED ring if you choose to activate this function.

Professional air purifier

# Specifications

## Design and finishing

- Color(s): Grey
- Material of main body: Plastic

## Performance

- Room size: 18 - 31 m<sup>2</sup>
- CADR (Particle): 260 m<sup>3</sup>/h
- CADR (Formaldehyde): 178 m<sup>3</sup>/h
- 0.3µm particle removal: 99 %
- Filters out PM2.5: 99.9 %
- Filters out H1N1 Virus: 99.9 %
- Filters out bacteria: 99.9 %
- Sound Power: 32 - 59.5 dB(A)

## Technical specifications

- Voltage: 220 V
- Frequency: 50 Hz
- Cord length: 1.6 m
- Power: 11 - 50 W

## Weight and dimensions

- Weight of product: 5.3 kg
- Dimension of product (LxWxH): 325 x 210 x 543 mm

## Replacement

- Integrated filter: AP2026/00

## Country of origin

- Made in: China

## Sustainability

- Stand-by power consumption: <0.5 W
- User manual: 100% recycled paper

## Service

- 2-year guarantee
