Exclusive design signature, maximum visibility to drive in safety and style

The new generation of high-power Luxeon LED daytime running lights improve your safety and style on the road, increasing your visibility day and night.

Exclusive design signature

- Homologated lightguide technology

Original Equipment Quality

- High-quality aluminium housing
- Water and gravel-impact resistant

24-hour visibility

- Dimmable: stays on night and day
- High power new generation LED
- Wide angle to be seen better

Easy installation for all cars

- Hybrid and electric car compatible
- Smart clip-on system

Highlights

Clip-on system

Simple installation with smart clip-on system. Install the brackets in any cavity and simply click the modules into place. The modules will lock tightly and are protected from theft.

Dimmable

Our Daylight solution stays on day and night. During the day, LED Daylight makes cars more visible and more rapidly detectable by the drivers of other vehicles or pedestrians moving in the opposite direction, which, as a whole, increases road safety. The system automatically dims at night.

Aluminium housing

The robust high-quality aluminium housing prevents corrosion and is weatherproof: water, salt, sand and dust stand no chance. The result is long life and no maintenance work.

Gravel-impact resistant

The high-quality aluminium housing and lens are water and gravel-impact resistant. After mounting, the system does not require any maintenance.

High power new generation LED

High power new generation LED

Homologated lightguide

The lightguide technology delivers a distinct lighting signature. Contrary to the dot appearance of earlier solutions, the light that is guided through the 2 beams is uniform and extends to a wider angle. As with all Philips solutions, the beam complies with all homologation standards.

Hybrid & electric compatible

The Philips Daytime Running Light range is compatible with hybrid and electric car technology.

Wide angle

The homologated Lightguide technology results in a uniform light diffusion without dots, and an ultra-wide beam.

Specifications

Maximum visibility

Intensity (DRL): 550 cd
Intensity (position light): 80 cd
Colour temperature: Up to 6000 K
Beam angle: 150% wider than standard
LED lifetime: Up to 5000 hours

Easy to install

Clip-on system
Start & stop compatible: with ACC control

Robustness

Premium finishing: High-quality aluminium housing
Gravel-impact resistant: Automotive test PSA B21 7090
DRL set resistant to: water, salt, dust & sand

Technical specifications

Application: Daylight
Homologation: ECE R87
Consumption (DRL): 2 x 7.7 W
Consumption (Position light): 2 x 2.4 W

Ordering information

Order entry: 12825WLEDX1
Ordering code: 38638733

Packaging Data

EAN1: 8727900386387
EAN3: 8727900386394

Product description

Technology: LED
Range: DayLightGuide
Homologation ECE
Voltage [V]: 12
