Awareness campaign

NEW

LIFEBOOK[®]

Small ideas.

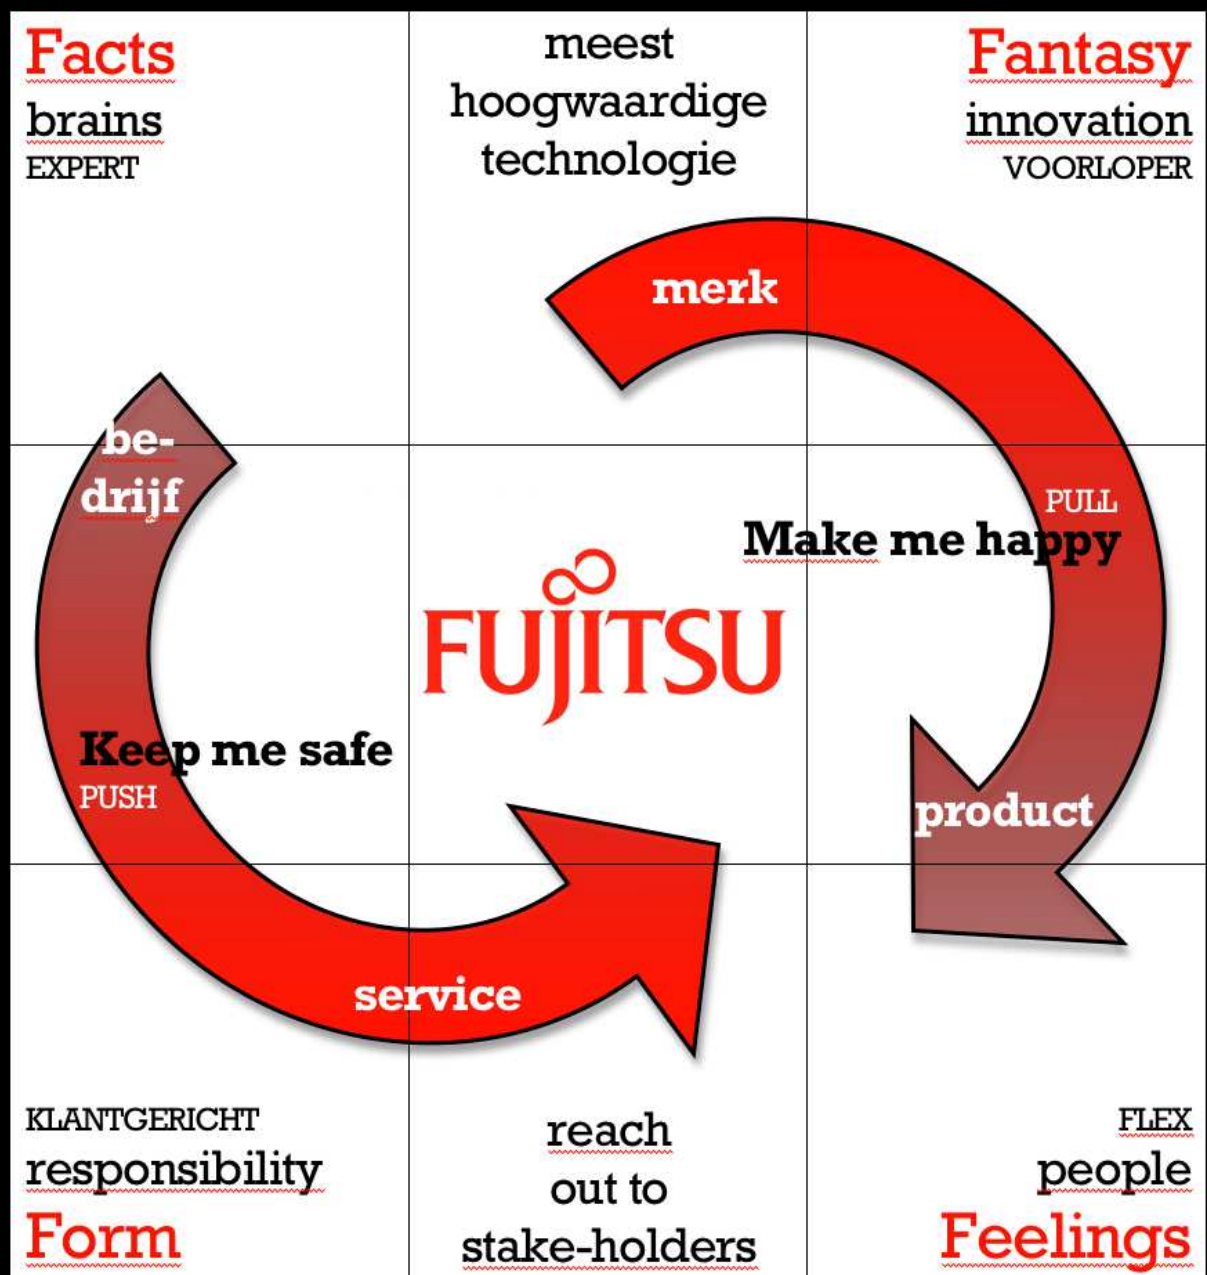

Big smile.

core message

The new **LIFEBOOK®** of Fujitsu is engineered with a large number of small innovations, that ALL contribute to a durable, qualitative system.

All small innovations are designed to keep the system safe and stable. These small ideas will bring a big smile to the system manager and to the user.

strategie

strategy

Fujitsu.

Keep me safe.

Make me

happy.

push strategy

KEEP ME SAFE.

Fujitsu works with **BRAINS** (expertise) and focus (**RESPONSIBILITY**) towards a sustainable relationship with partners, resellers and all stakeholders. A Business Model with excellent service and tested, proven technology.

pull strategy

NEW LIFEBOOK® FUJITSU Small ideas. Big smile. Your PC, simplified.  Windows 7 magnesium lid Safe and strong, Your LIFEBOOK is more durable as internal parts are protected from all outward pressure on the lid spill-resistant keyboard Spilled coffee over your keyboard? Don't worry. You'll have enough time to shut down your LIFEBOOK and remove all liquids shock sensor When your LIFEBOOK senses shocks and vibrations, it will prevent damage to the hard disk by the magnetic head hard disk cushioned protection Your LIFEBOOK's hard disk drive comes with rubber cushions encasing the hard disk to absorb vibrations magnetic protection shield Your LIFEBOOK has a special film protecting the hard disk drive from magnetic interference solid state drive With a solid state drive your LIFEBOOK uses flash memory without an actual disk or magnetic head. Excellent for its durability adapter and second battery Save time and money with the LIFEBOOK family concept. You can easily swap systems and devices among each other family concept port replicator Connect your LIFEBOOK to several devices with just one click battery life Increase your productivity. You can work on your LIFEBOOK all day long using only battery power status led Your LIFEBOOK's LED indicators give an easy and quick view on power and configuration status	light weight Easy to carry in and out of office. Your LIFEBOOK will comfortably fit on your lap, even in the smallest plane seats modular bay You can insert all kinds of accessories in your LIFEBOOK's modular bay, like a second battery or extra hard disk drive eco-button With the press of one button your LIFEBOOK can save energy and extend battery life. This eco-button will give you enhanced power management settings ambientlight sensor The ambientlight sensor adapts the power management settings to the surrounding light. That way, your LIFEBOOK will save energy and extend battery life automatically advanced theft protection Protect your LIFEBOOK from jealous eyes. You can disable, track and recover your missing LIFEBOOK latest Intel® mobile technology With your LIFEBOOK you can increase your productivity. Do more at the same time with Intel inside anytime usb charge You can shut down your LIFEBOOK when you sleep or are away and still power charge your accessories multiple touch mousepad Enjoy the benefits of multiple touch with the dual digitizer mousepad integrated smart card reader Limit access to your LIFEBOOK. It will not boot to the operating system without your SmartCard embedded UMTS With built-in UMTS you can work online both in and outside the office extended guarantee Your LIFEBOOK will last a very long time. That's why we can easily extend your product guarantee to five years tested over 10,000 times in Germany All new technological improvements are rigorously tested in Germany before we implement them in your LIFEBOOK FUJITSU NEW LIFEBOOK Small ideas. Big smile. LIFEBOOK notebooks are Fujitsu's ultra-thin, lightweight, mobile technology. Due to our product development we are using longer warranties. Still, your laptop battery should be replaced every two years and hard disk should be replaced every two years. But we give you the best warranty. WWW.LIFEBOOK.NL
