PHILIPS

Highlights

3-size ultra-soft silicone caps

The 3 sizes of ultra-soft silicone caps of these Philips earphones sit comfortably in your ears without adding pressure to them whilst blocking out unwanted noise.

For best sound at low volume

You don't have to turn up the volume in noisy places any more. Angled Acoustic Pipe and the perfectly sealing ear buds cut off background noise significantly, delivering the same quality sound at a lower volume and with a longer battery life.

Soft memory foam cushions

Ultra-soft memory foam cushions perfectly shaped around the contours for your ears. This gives you the best fit while you hardly feel them.

Precisely tuned acoustics

The perfect in-ear seal of these earphones will surprise you with exceptional noise isolation.

Premium metal housing

Housed in superior metal, these earphones are shielded from unnecessary vibration for accurate sound transmission, resulting in smooth bass response and clear mid-to-high-range tones.

Uniquely curved design

A unique curved headphone housing design enables easy grip and makes it easy to get perfect in-ear fit - even on the go.

Integrated microphone

With the integrated microphone and call button you can use this Philips headset for

music as well as calls from your mobile phone. Enjoy hands-free calling, while easily accepting and ending calls from your headset.

Your own personalisation

Download the Philips Headset App to personalise the sound of your headset as well as the remote to Answer/End call, Play/Pause music, Adjust volume +/- and Change tracks.

Flexi-grip design

The soft flexi-grip material that the body of the headphone is sheathed in enhances its performance and extends its durability. It protects the cable connection from damage that otherwise could occur due to repeated bending of the headphone body from frequent contact with the user's fingertips when being put on and removed.
