

PRODUCT SPECIFICATION

|                             |                               |
|-----------------------------|-------------------------------|
| ► part number               | 1845                          |
| ► current rating (A)        | 16                            |
| ► voltage rating (VAC)      | 250                           |
| ► temperature rating (°C)   | -25 to +70                    |
| ► plug type                 | IEC60309 3-Pole Moulded, IP44 |
| ► plug colour               | Blue                          |
| ► plug style                | straight                      |
| ►                           |                               |
| ► connector type            | IEC60320 C19                  |
| ► connector colour          | Black                         |
| ► connector style           | straight                      |
| ►                           |                               |
| ► cable type                | H05VV-F 3G1.50mm²             |
| ► cable outer diameter (mm) | 8,5                           |
| ► cable colour              | Black                         |

|                       |            |
|-----------------------|------------|
| ► cable length (m)    | 2.50       |
| ► cable size (mm²)    | 1,50       |
| ► cable material      | PVC        |
| ►                     |            |
| ► weight (kg)         | 0.180      |
| ►                     |            |
| ► plug approvals      | TÜV        |
| ► connector approvals | VDE        |
| ►                     |            |
| ►                     |            |
| ► marking             | CE         |
| ► Last modification   | 2009-04-09 |
