

Leading technology for leading business

FUTURE-PROOF HARDWARE PLATFORM. High performance for cutting-edge applications. CELSIUS workstations offer the latest multi-core processor technology from Intel® and AMD® They support 64-bit operating systems and applications, and the latest generation of professional OpenGL PCI Express graphics. This provides customers with a high-performance and futureproof hardware platform. 3D modelling, animation, real-time visualization of product data or the analysis of simulation results - CELSIUS workstations are made for highest demands. It comes as no surprise that leading automakers develop next-generation cars on CELSIUS workstations and financial experts working in forecast and risk calculation trust this outstanding performance and reliability as well.

TODAY’S GREEN WORKSTATIONS.
Meeting tomorrow’s standards.
Fujitsu voluntarily implements the GREEN Concept for manufacturing computers. This concept exceeds legally mandated environmental directives by setting an even higher standard to protect the environment and natural resources. CELSIUS workstations are available in ENERGY STAR® certified configurations.

FUTURE TECHNOLOGY. Engineered to perform perfectly.
CELSIUS workstations combine innovative technology with environmental consciousness. Fujitsu has developed GREEN, halogen-free mainboards so that CELSIUS workstations already meet the environmental standards of tomorrow. The system’s modular design facilitates disassembly, and only recyclable materials are used. The modular design also supports the use of the optional rack mount kit so that CELSIUS M Series, CELSIUS R Series and CELSIUS V Series models can be installed easily in standard 19-inch racks to build computer clusters and render farms. Two-handed power lets you zoom or rotate 3D model scenes or a camera with a 3Dconnexion SpacePilot in one hand, while using a mouse with the other hand.

Fujitsu recommends
Windows Vista® Business.

CELSIUS Workstations

Superiority and High Performance

- CELSIUS H Series
- CELSIUS W Series
- CELSIUS M Series
- CELSIUS R Series
- CELSIUS V Series

Fujitsu recommends
Windows Vista® Business.

Powerful workstations for demanding applications like simulation, animation, design, digital content creation and finance. Latest technology for cutting-edge performance. Certified for all workstation applications.

COMPETITIVE ADVANTAGE.
Europe’s most advanced facility.

The CELSIUS workstation family is developed and manufactured in Europe’s most modern computer factory in Germany. No matter what your demands may be, customized solutions create added value for your business with special configurations and integration of individual components. Fujitsu makes extensive use of mainboards from in-house development and production. This results in a product with the highest quality, reliability and stability.

THE LATEST TECHNOLOGY. Power makes the difference.

CELSIUS workstations are powerful systems that make your work run smoother and faster. They are optimized and certified for running leading workstation applications with maximum performance and reliability based on the latest multi-core processor architectures from Intel® and AMD® All CELSIUS workstations are available with pre-installed Microsoft® Windows Vista® Business 64bit. Users can fully benefit from up to 96 / 192* GB of memory.

THE POSSIBILITIES ARE INFINITE

ENGINEERED TO PERFECTION.
Unprecedented visualization.

CELSIUS workstations distinguish themselves through outstanding graphics performance. Fujitsu cooperates with the leading manufacturers of graphics cards by conducting joint optimization and integration tests. This makes CELSIUS the right choice for all types of calculations and graphics-intensive applications like compositing, video editing, post processing or virtual reality. PCI Express is the standard interface technology for graphics, providing additional bandwidth (8 GB/s full duplex on PCI Express Gen 2) and performance for the next decade. Even two ultra high-end graphics cards can be configured to additionally enhance graphics performance.
