

8/16-Port KVM Over the NET™ (Cat 5 KVM Switch with 1 Local 2 Remote User Access)

The KN2108/KN2116 KVM switch series offers a practical and affordable management solution for data centers housing a large number of servers. These switches are ideal for network administrators who are responsible for mission critical operations and require 24/7 server room access.

The KN2108 and KN2116 allow 3 administrators- one logged in at a local console; the other two logged in remotely from any IP connected web browser-and up to 32 users to securely monitor, manage, troubleshoot or run applications from up to 8 and 16 connected devices respectively
