- Design fit for iPod/iPhone/iPad
- Dock any iPod/iPhone/iPad, even in its case
- Free DockStudio app for internet radio & other cool feature

PHILIPS

Features

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost

can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Superb gaming sound effects

The gaming experience is never complete without great sound effects. Now your games from Smartphone or any portable device can be made even more thrilling, thanks to Philips docking speaker that puts the boom in the sound. Hear all the sounds loud and clear, and boost your experience to new levels. What's more, you can do this with outstanding convenience, via Bluetooth. Simply make the wireless Bluetooth connection between your portable device and the docking speaker, and play away.
