HTS6600

Immersive surround sound

with Ambisound

Featuring Ambisound, the HTS6600 delivers an embracing multi-channel surround experience from just two speakers, in any sort of room. Providing excellent sound and picture quality, the easy-setup wall-mountable system fits into any home.

Bring audio and video to life

- Ambisound for surround sound from fewer speakers
- Smart Surround optimizes surround settings automatically
- DoubleBASS for an extended, deep bass experience
- HDMI 1080i with high definition video upscaling

Fits any space, any lifestyle

- Vertical speakers that can be wall-mounted with your Flat TV
- Sophisticated design that matches any flat TV
- Quick and easy set-up for no-fuss installation

Connect and enjoy multiple sources

- Connect your iPod for audio and video playback
- USB Direct plays photos and music from USB flash drives
- MP3 Line-in for music playback from Portable Media Players

PHILIPS

Highlights

Ambisound

Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

Smart Surround

Enjoy the best possible listening experience without having to make surround setting changes every time you change a disc or switch

between movies and music. Unlike normal 5.1 systems that feature default multi-channel surround settings, Smart Surround automatically changes the surround settings to suit your music encoded in stereo or your movie with multi-channel content.

DoubleBASS

DoubleBASS ensures you hear even the deepest bass tones from compact-sized subwoofers. It captures low frequencies and recreates them in the audible range of the subwoofer - delivering sound with more boom and panache, and ensuring you a full, uncompromised listening experience.

HDMI 1080i

HDMI stands for High Definition Multimedia Interface. It is a direct digital connection that can carry digital HD video as well as digital multichannel audio. By eliminating the conversion to analog signals it delivers perfect picture and sound quality, completely free from noise. HDMI is fully backward-compatible with DVI (Digital Video Interface).

Connect your iPod

This unique connection allows you to hook up the Philips dock to the home theater system for media playback from your iPod. With Extended User Interface, you can also enjoy the convenience of direct access and viewing of your iPod content on your TV screen.
