

HP Write Manager

Effortless IT management starts here.

The flexible, new HP Write Manager makes IT management and security a breeze. An all-new design makes configuration changes and custom profiles setups simple with minimal end-user interruptions.

HP's ground-up design and build of the HP Write Manager will meet the ever changing needs of your organization which includes flexibility, performance and reliability.

Easy configuration with minimal interruptions

Experience a flexible write filter for easy configuration. Creating custom write filter profiles is simple and the application of changes are applied automatically with minimal end-user interruptions.

Built to last

Get the most out of your hardware investment. The HP Write Manager secures and extends the life of your device by preventing unauthorized changes to the end user environment and OS, and reducing overall write wear.

IT management made easy

Ease the burden of IT admins with a single, simple write filter solution that works across Windows® operating systems with built-in optimization for Windows® security features required by today's enterprises.

Added value comes standard

All of the features of HP Write Manager are included only on HP Thin Clients with a Windows® operating system- a lot of value at no additional cost.

Why use HP Write Manager?

- Experience improvement in the performance of your thin clients
- Optimized to support standard Enterprise Windows management capabilities such as domain join, run anti-virus solutions and apply periodic Windows® updates
- HP Write Manager will manage how the writes are performed to the flash and optimize them for system reliability and stability

Supported Operating Systems:

Windows 7 (SP1 or higher) 32- or 64-bit

Windows 10 32- or 64-bit

Windows Embedded Standard 7E 32-bit

Windows Embedded Standard 7P 64-bit

Windows Embedded Standard 8 64-bit

Windows Embedded 8.1 Industry 64-bit

Windows 10 IoT Enterprise 64-bit
