- AUX-in for easy connection to almost any electronic device
- SoundStudio app for complete control of audio settings

PHILIPS
Fidelio

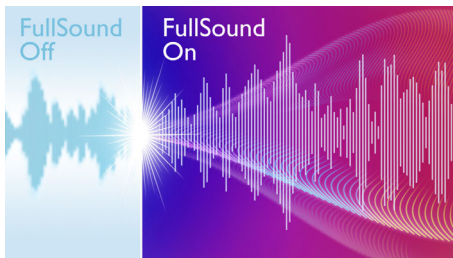

Highlights

SoundRing

A truly distinctive design and engineered to provide room-filling sound. It comprises a central bass sound pipe and four high definition drivers - two front-firing and two side-firing drivers powered by Neodymium magnets, to radiate sound all around, for a great clarity throughout the whole room.

FullSound

Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you can experience music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.

AirPlay wireless technology

AirPlay lets you stream your entire iTunes music collection to your Philips Fidelio docking stations. It plays wirelessly from the iTunes program on your computer, iPhone, iPad or iPod Touch - to any AirPlay-enabled speaker in your home. All you have to do is ensure your speakers are connected to your Wi-Fi network. AirPlay also lets you play simultaneously on every speaker in every room. Get your favorite tunes to follow you whichever room you go.

SoundStudio App

Have music the way you like it now. SoundStudio truly puts the power over your music into the palm of your hands. It lets you change every aspect of sound, using only your iPhone, with controls that are intuitive and simple. Now you can tweak, tailor and create your desired sound experience and have your favorite songs come to new life. SoundStudio also lets you listen to thousands of Internet radio stations worldwide, broadening your music experience even further.
