- Notes
- 1) Administrator access is required to run SOS with Windows 8 & 8.1
 - 2) LTFS currently does not support P212 and P222 controllers on Windows 32 bit systems.
 - 3) RHEL 6 update 1 through update 5
 - 4) RHEL 5 update 5 through update 10
 - 5) SLES 11 SP2
 - 6) Minimum Mac version supported is Mac 10.7 (LTFS requires OSXFUSE 2.5.1 for Mac 10.7 and 10.8 and OSXFUSE 2.6.2 for Mac 10.9)
 - 7) LTFS Standalone software for Windows is not compatible with systems that have Apple iTunes installed. This is due to a filter driver installed as part of iTunes, which prevents correct control of the tape device.

- 2) There are limitations with the native backup application.
- 3) MacOS X does not have native support for iSCSI devices. A third party iSCSI-Initiator software is necessary to establish a connection to the RDX QuikStation.
- 4) Connection tests performed using attotech Xtend SAN v3.45

It does allow the user to eject the cartridge using Windows Explorer (right-click on drive letter, select "Eject").

Tandberg Data supplies a utility that allows the eject button to operate properly on Windows. This utility runs as a Windows service. See the RDX Utility Users Guide for installation instructions.

Linux/Mac OS X/Solaris

Linux, Solaris and Mac OS X do not typically support the eject button operation. Use the recommended system method to eject the removable media.
