IMPORTANT SAFETY INSTRUCTIONS

WARNING: A WARNING alerts you to the possibility of serious injury or death if you do not follow the instructions.

CAUTION: A CAUTION alerts you to the possibility of damage or destruction of equipment if you do not follow the corresponding instructions.

WARNING: Failure to read, thoroughly understand, and follow all instructions can result in serious personal injury, damage to equipment, or voiding of factory warranty! It is the installer's responsibility to make sure all components are properly assembled and installed using the instructions provided.

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component.

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the combined weight of all components located within the rack does not exceed 150 lbs (68.0 kg). Use with products heavier than the maximum weight indicated may result in instability or collapse of the rack causing possible injury.

IMPORTANT ! : Minimum spacings between the Accessories and components and the (ITC/AV) Rack Enclosure shall be maintained for safe operation of the equipment when installed in accordance with the National Electric Code, ANSI/NFPA 70-2008. Operating temperature inside rack shall not exceed 104°F.

TOOLS REQUIRED FOR INSTALLATION

#2

PARTS

B (2)
[Side panel]

(ER-8 as example)

F (1)
[Rack rail - right]G (1)
[Rack rail - left]

INSTALLATION

1. Lay two side panels (B) flat with pilot holes facing up. (See Figure 1)
2. Orient one rack rail so that the shorter edge of rack rail faces the front of the rack. (See Figure 1)
3. Attach rack rail (F or G) to side panel (B) using #10 x 5/8" Phillips wood screw (D) in larger holes on rack rail.

NOTE: All fasteners may not be used. Use one fastener in each pilot hole in side panels. Number of pilot holes will vary by model.

4. Repeat Steps 2 and 3 for the second side panel.

Figure 1

5. Place one top/bottom (A) piece standing up on its edge next to one of the side panel (B) pieces. (See Figure 2)
6. Install one 7mm x 50mm wood screw (C) into pre-drilled hole on side panel. Fasten the screw all the way into the panel but leave somewhat loose until all screws are installed. (See Figure 2)
7. Install remaining wood screws into the side panel in same manner.

Figure 2

8. Attach remaining side panel to assembly using one 7mm x 50mm wood screw (C) into pre-drilled hole on side panel. Fasten the screw all the way into the panel but leave somewhat loose until all screws are installed. (See Figure 3)
9. Install remaining wood screws into the side panel in same manner.

Figure 3

10. Install the second top/bottom piece (A) into place, using three 7mm x 50mm wood screws (C) into pre-drilled holes on each side panel. Fasten the screws all the way into the panel but leave somewhat loose until all screws are installed.
11. Tighten all screws after all sides, base and top are positioned and aligned.
12. Insert head caps (E) over the 7mm x 50mm screws (C).

LOADING THE RACK

Load Distribution

CAUTION: BEGIN PLACEMENT OF LOAD AT BOTTOM OF RACK! Load rack, moving from bottom toward top of rack. Loading rack incorrectly may result in instability causing possibly injury and/or damage to components.

1. Begin placement of components into the rack at the lowest point.
2. Continue placing items into the rack, moving from the bottom upward.

CAUTION: DISTRIBUTE LOAD CORRECTLY! Load rack with 2/3 total weight of components in the lower half of rack. Loading rack incorrectly may result in instability causing possible injury and/or damage to components.

Our Mounts. **Your Vision.**
