

Epson AcuLaser MX14 Series

DATASHEET

The AcuLaser MX14 Series are compact all-in-one monochrome devices that refuse to compromise on performance or quality.

The models in the series are among the smallest units in their class and are ideal for maximising desktop workspace in busy or cluttered offices.

Extremely productive for busy offices, the series boasts a fast print speed of 24 pages per minute delivered at a very high print resolution of 1200x1200dpi. Enhance performance with a 128MB standard memory – one of the highest in its class.

The MX14 Series has everything a user could require from an all-in-one. In addition to multi-function print, copy and scan features, the MX14NF¹ offers faxing and network capabilities as well.

This series has been developed for the business user and provides peace-of-mind printing, reliably handling large print jobs day after day with little maintenance required. The toner cartridge is the only supply item requiring replacement, also helping to keep the total cost of ownership down.

The MX14 Series has an ENERGY STAR-qualified reduced power consumption, helping businesses to cut costs and environmental impact.
