- Large display for clear recording status information

Designed around you

- 2 GB memory built-in for up to 22 days of recording
- Micro SD memory card slot for virtually unlimited recording
- Time-stamped recording for easy file navigation

PHILIPS

Highlights

Voice-activation function

Voice-activated recording is a convenience feature for hands-free recording. When enabled, recording will start automatically when you start speaking. Recording stops automatically after you stop speaking and restarts automatically when you start speaking again.

2 GB memory built-in

2GB

With the 2 GB of built-in memory, your Voice Tracer is able to capture up to 22 days of continuous recording.

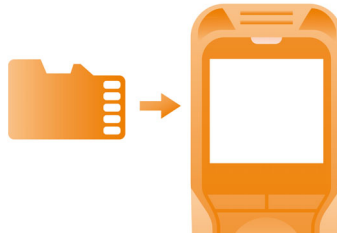

2Mic stereo recording

Recording in noisy environments can be a hassle and for clear playback and good speech recognition results, a high-quality recording is essential. The Voice Tracers feature 2 built-in stereo microphones that are designed to

deliver speech clarity and reduce background noise.

Micro SD memory card slot

Virtually unlimited recording capacity thanks to a micro SD memory card slot supporting up to 32 GB of additional memory.

Stereo MP3 recording

mp3

The Voice Tracer captures all recordings in stereo and the popular MP3 format, the common audio format for consumer audio storage, as well as a de facto standard encoding for the transfer and playback of recordings.

Time-stamped recording

Thanks to time-stamped recording, the date and time of your recordings are added to the sound file, allowing you to easily find and navigate through your file library.

One-touch operation

Press and hold the record button for a moment to switch the Voice Tracer on and start recording instantly.

Plug and play

Your VoiceTracer just works - Plug and Play in Windows, Mac OS and Linux.

Large display

The high-resolution dot matrix display built into the Voice Tracers supports 8 languages and provides clear recording status information.
