

User Manual *LivingColors* Mini

Getting started with your *LivingColors*

Unpacking and Installing

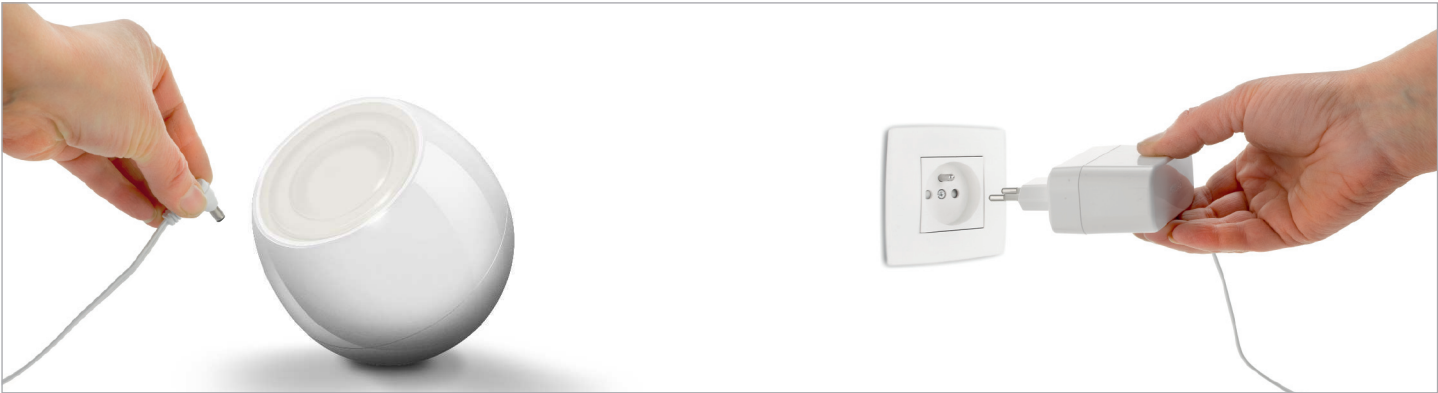

If you unpack a *LivingColors*, you only need to plug the cable into the back of the product, connect it to the power system and start the experience!

Step 1: Place your *LivingColors* in a selected location on a flat and stable surface and direct it to the wall.

Step 2: Plug the cable into the back of the product.

Step 3: Plug your *LivingColors* into the power system.

Basic functionality

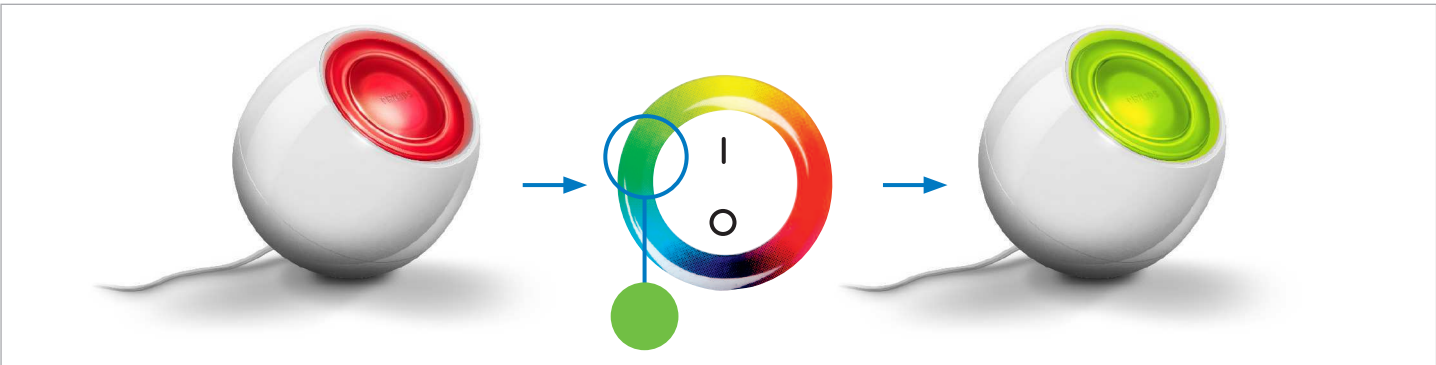

Turn the *LivingColors* “On” or “Off”:

Your *LivingColors* can be turned “On” and “Off” by using the “I”- and “O”-button on the back of the product. If you turn the *LivingColors* “Off”, it will remember your last setting for the next time you use it.

Colour selection:

To let your *LivingColors* change to whatever colour you like, simply select the colour on the colour circle by touching it. If you sweep around the colour circle with your finger (without taking it off) you will be able to fine-tune your selected colour and get the full range of 256 different colour options.

Extended functionality

Automatic Colour Change Mode:

You can also let your *LivingColors* change colours automatically. Hold the “I”-button on the back of the product for 5 seconds. The Automatic Colour Change Mode will now start looping through the colours.

To exit the Automatic Colour Change Mode, simply switch off the *LivingColors* using the "0"-button. Then use the "I"-button to switch it on again. The Automatic Colour Change Mode is now stopped.

Problem solving

Reset the luminaire by unplugging it from the power network. Wait for 30 sec and plug it back in.
