- Voice recording to take notes or record anything, anytime

Easy and intuitive

- Philips Songbird: one simple program to discover, play, sync
- Smart Shuffle to listen to what you like most first
- Folder view to organise and view media files as you do on your PC

PHILIPS
sense and simplicity

Highlights

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed MP3 music in true-to-life sound that will touch your soul and move your feet.

Philips Songbird

One simple, easy-to-use program that comes with your GoGear player, Philips Songbird lets you discover and play all your media, and sync it seamlessly with your Philips GoGear. Its intuitive and powerful music management features let you discover new artists and music styles directly in the program through music and media stores, services and websites. Play your own library and media from the Internet and seamlessly sync all of it from your PC to your Philips GoGear.

Audible

Audible.com is your destination for the widest selection of digital audiobooks, magazines, radio shows, stand-up comedy and more available for download. Enjoy books in the car, at the gym or around the house. Authors and icons read their own works, and famous actors narrate your favourite titles. At Audible.com you can browse and sample over 75,000 selections, including the latest bestsellers and timeless classics.

Sound isolation headphones

With sound isolation headphones, you will hear greater music details at a lower volume than is possible with normal headphones. Based on thorough understanding of the human ear canal anatomy, the sound isolation headphone's angled acoustic design creates a perfect seal between the ambient sound source and the ear canal, thus eliminating unwanted background noise while delivering sound directly to your ears. Even at a moderate volume setting, you can still discern music details without noise distractions from the environment. Earphone sleeves are available in three sizes to provide the best fit.

6.1 cm/2.4" full colour display

A cool 6.1 cm (2.4") high-resolution display on your GoGear player offers excellent video quality and crisp, vivid images. Together with a full colour menu, the large screen allows easy navigation of media files to complete the package for an all-round multimedia experience on the go.

45-hour music/5-hour video

Forget about the hassle of having to recharge your GoGear player battery constantly. This extremely long lasting player allows you to savour your favourite tunes for up to a whopping 45 hours of continuous music playback or up to 5 hours of video playback - all on a single charge. Now you can sit back and listen to music all day long or watch the equivalent of 3 movies back-to-back wherever you go.

FM radio with RDS/20 presets

RDS (Radio Data System) is a communications protocol standard that allows digital information to be transmitted over FM radio broadcasts. RDS-enabled FM radio receivers can display useful information including station identity, programme details and song title and artist etc. You can store a desired station as a preset channel on your GoGear player at any time. With the ability to store 20 preset radio stations, you can quickly access your favourite radio station without having to tune the frequencies manually each time.

Specifications

Picture/Display

- Backlight
- Type: LCD
- Diagonal screen size (cm): 6.10 cm
- Diagonal screen size (inch): 2.4 inch
