Perfect bouncy curls and waves

SalonCurl Pro

The SalonCurl Pro features a ceramic 25 mm curling tong and adjustable digital settings so you can create beautifully shiny curly looks in minutes. Once you've styled, simply set and go.

Ease of use

- Cool tip for easier and safer use
- Dual voltage for worldwide use
- Automatic shut-off after 60 min
- Easy storage hook for convenient storage
- Salon length 3 m power cord for maximum flexibility

Beautifully styled hair

- 210°C professional high heat for perfect salon results
- Ceramic Tourmaline for frizz-free curls and maximum shine
- 1" tong for beautiful curls and waves
- Adjustable heat settings to ensure smooth results for every hair type

Less hair damage

- EHD+ technology for more protection and shinier results

Time saving

- Instant heat: ready to use within 30 seconds

Highlights

1" tong

If you want to create beautiful curls or waves, you need a curling iron with a medium-sized diameter. 2.5 cm (1") is the perfect size for creating fashionable curls and waves. Truly the professional's choice.

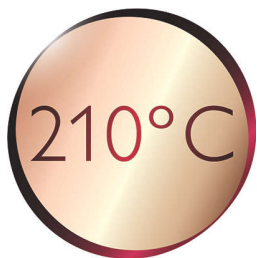

Ceramic Tourmaline (curling tong)

Tourmaline is a precious gemstone with natural ionic properties. This knowledge has been used to optimise our Ceramic curling iron. This specially developed tong harness the unique properties of ceramic and tourmaline to perfectly distribute heat across the tong for high shine results. Enjoy frizz-free curls and maximum shine with Ceramic Tourmaline.

Adjustable heat settings

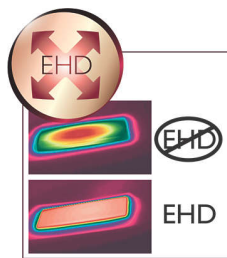

Adjustable heat settings allow you to quickly and easily change the styling temperature from low to high. This enables you to select the perfect temperature for your specific hair and needs so you can always get the smooth, styling result you want.

210°C professional temperature

This high temperature enables you change the shape of your hair, and gives you that perfect look, as if you've just come from the salon.

EHD+ technology

Advanced Philips EHD+ technology means that your styler will always distribute the heat very evenly – even at high temperatures, and prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

Instant heat

No more waiting around for your styler to heat up; this allows you to switch on and get styling.

Cool tip

The tip of the styler is made from a special heat insulating material to keep it cool; you can safely hold it while you're styling for optimal ease of use.

Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

Dual voltage

Dual voltage for worldwide use

Safe usage

Some hair straighteners and curling irons have been equipped with an automatic shut-off feature. This feature has been designed to provide peace of mind. If left on, the appliance will automatically switch off after 60 min.

3 m cord

The longer length results in improved flexibility and ease of handling, so you can use it anywhere you want.
