Vibration

- Frequency (max): 120 Hz
- Number of intensities: 5
- Number of modes: 4
- Sound level (average): 46 dB
- Sound level (max): 49 dB

Highlights

One stimulation spot

The rounded, rippled tip is perfect for teasing and tantalising in more focused ways and locations, such as around the nipple or between the genital and rectal area. You can add even more variety and excitement to the sensation by moving the massager in circles, or a figure of 8, and experimenting with different vibration modes. Try a relaxing pulse on the labia or scrotum, for instance, followed by an intense pulse on the clitoris or penis.

Multiple vibration settings

Stimulating sensations with multiple vibration settings and intensities. There are four vibration modes: Glow, Wave, Heartbeat and Thrill for arousing variety. The Sensual Massager is an 'extension' of your hands and fingers that can create even more sensual feelings in the erogenous zones. Simply stroke, circle or hold it on the places your partner finds most arousing - the same ones you would kiss, caress or tickle. Although designed to make foreplay even more fantastic, the massager can also be used to enhance other moments of shared touch, such as during an affectionate foot or neck rub.
