Intuitive control

- SoundStudio app for complete control of audio settings
- Remote control complements speaker design and finishing

2012

PHILIPS
Fidelio

sense **and** simplicity

Highlights

SoundCurve

The carefully designed curved back cover of this Philips docking speaker creates a highly effective acoustic structure for sound reproduction. Its clean curve enforces the rigidity of the speaker cabinet, dramatically reducing internal resonance and eliminating the vibration and distortion of sound. You get to enjoy superb crystal-clear sound in stunning-looking speakers.

FullSound™

Philips' proprietary FullSound technology uses latest-generation Digital Signal Processing to faithfully enhance music rendering. Music content is dynamically analysed and optimised to let you experience music with great detail and warmth.

Bass-reflex design

Bass-reflex acoustic load uses a bass pipe tuned to the acoustic volume of the speaker box, in order to reproduce deep bass from compact enclosures. The carefully designed profiled bass-pipe helps air flow and allows for deep and impactful bass, even at loud volumes while minimising air turbulence that may cause distortion.

AirPlay wireless technology

AirPlay lets you stream your entire iTunes music collection to your Fidelio docking stations. It plays wirelessly from the iTunes program on your computer, iPhone, iPad or iPod Touch to any AirPlay-enabled speaker in your home. All you have to do is ensure your speakers are connected to your Wi-Fi network. AirPlay also lets you play simultaneously on every speaker in every room. Make your favourite tunes follow you into whichever room you go.

SoundStudio App

Have music the way you like it now. SoundStudio truly puts the power over your music into the palm of your hands. It lets you change every aspect of sound, using only your iPhone, with controls that are intuitive and simple. Now you can tweak, tailor and create your desired sound experience and have your favourite songs come to new life. SoundStudio also lets you listen to thousands of Internet radio stations worldwide, broadening your music experience even further.

USB charging

This docking device is equipped with a USB port, which allows you to charge your iPod, iPhone or iPad.
