

USB DVI VGA External Dual or Multi Monitor Video Adapter

Product ID: USB2DVIE

This USB to DVI/VGA Multi-Monitor External Video Adapter acts as an external video card for any USB 2.0 laptop or desktop computer. The external video adapter converts a USB 2.0 port into a DVI-I port - providing high quality dual display or multi-monitor capability that allows you to mirror or extend the desktop shown on the existing display as needed.

For an even more versatile multi display configuration, up to five USB to DVI/VGA video adapters can be connected to the same computer simultaneously, allowing for a total of five USB connected DVI monitors to display video from a single computer.

The USB to DVI/VGA External Multi Monitor Video Adapter can also be connected to VGA monitors using the included DVI to VGA adapter, and can be connected to an HDMI display using a [DVI to HDMI Adapter](#) (HDMIDVIFM - Not included).

Certifications, Reports and Compatibility

Applications

- Excellent solution for notebooks enabling the connection of multiple adapters to multiple displays (up to six monitors, including notebook display).
- Run multiple applications on different screens, check your email on one display and work on a document in the other.
- Run in extended mode where your desktop can span across multiple screens or mirror you image as if you were using a video splitter.

Features

- Add a secondary display adapter and extend your desktop/notebook display without taking apart your computer to install a new video card
- No power adapter required and easy to install
- Supports resolutions up to 1600x1200 and 1680x1050(for widescreen / format displays) @ 32 bits
- Acts as an external video card connected through USB 2.0

Hardware	Warranty	2 Years
	AV Input	USB 2.0
	AV Output	DVI
