- SMS storage capacity: 10

Highlights

Plug & Play pack - 2 handsets

The unique soft touch feel ensures that the phone lies perfectly within your hand and increases comfort while calling.

Free intercom

No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

Caller name & number display

The name of the person or company calling is shown on the telephone display. The names of first-time callers can be displayed as well as those that are programmed into the telephone beforehand.

Keep in touch by SMS texting

The SMS is a simple way to exchange information over the telephone line. You first type your text off-line and when you are ready, you send it to as many people as you like.

Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.
