

CS72E/CS74E

2/4-Port PS/2 KVM Switch

- The KVM (Keyboard, Video, and Mouse) switch is a control unit that allows access to two/four computers from a single console (keyboard, monitor, and mouse). With its custom designed connectors, the significantly reduces the number of ports required for a 2/4 port KVM switch. The design features a custom SPHD-15 male connector for the keyboard, video, and mouse, and SPHD-15 female connectors for the cables that connect the switch to the computers.

Features

- One console controls two or four computers – Non-powered
- Logical connector layout – SPHD-15 connectors at rear panel for PC and console connections
- Supports Microsoft IntelliMouse and the scrolling wheel on most mice
- Easy to operate – Computer selection via push button switches and hotkeys
- Power on detection – automatically switching to the first powered on port
- Auto scan function to monitor computer operation
- Superior video quality – supports resolution of up to 2048 x 1536; DDC2B

CS72E (Rear)
