

HP Compaq dc7800 Business PC Series

PCs designed to be the foundation of your business

HP recommends Windows Vista® Business.

The HP Compaq dc7800 Business Desktop PC is designed for businesses that require best-in-class lifecycle management, solutions that help keep you up and running more securely, as well as specialized designs to fit your individual needs. Plus, you can rely on the engineering experience built in so you can make the right choice and spend more time concentrating on your business success.

Helping to keep you up and running securely

HP Compaq dc7800 PCs help to protect your physical and intellectual properties with an enhanced assortment of security tools so you can customize your PC to fit your needs.

- Get more effective identity protection with HP ProtectTools™ security software suite, which offers an extremely powerful set of multi-factor authentication and access controls.
- Keep your users up and running while securing data with optional RAID 1 configurations.
- Reduce disruption and protect your data against corruption with HP Backup and Recovery Manager.
- Help safeguard your physical assets against theft or tampering with PC security locks and remotely manageable HP Solenoid locks.

Best-in-class lifecycle management solutions

Increase the efficiency of planning, deployment and transition of PCs with a variety of proven manageability tools, such as HP Client Manager.

- Gain more value from your IT investment with superior technology, longer lifecycles and support for upcoming technologies.
- Maintain a more consistent work environment and reduce support costs with a stable software image and 15+ months of platform stability.
- Eliminate guesswork and enhance proactive planning with valuable information from the included Change Control and Proactive Notification service.

Specialized designs to fit your needs

The flexible choice for business, the HP Compaq dc7800 PC offers power-efficient options and innovative form factors so you can create the PC that fits your environment.

- Select Intel® vPro™ Professional platforms,* featuring Intel® Active Management Technology 3.0 and support for virtualization technology, for added manageability and security benefits.
- Increase flexibility and productivity with features created for businesses like yours—so you can focus on your business success, not your PC.

Limited warranty	3-years/3-years/3-years		

*The HP dc7800 PC is enabled for Intel vPro Technology. Some functionality of this technology, such as Intel Active management technology and Intel Virtualization technology, requires additional third-party software in order to run. Availability of future "virtual appliances" applications for Intel vPro technology is dependent on third-party software providers. Compatibility of future "virtual appliances" with Microsoft Windows Vista operating system is yet to be determined.

¹ Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwarereqs.mspx and www.microsoft.com/windowsvista/getready/capable.mspx for details. WindowsVista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.

² Windows Vista Business disk also included for future upgrade, if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order annually at least 25 customer systems with the same custom image.

³ Dual core/quad core is a new technology designed to improve performance of multi-threaded software products and hardware-aware multi-tasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology.

⁴ 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information.

⁵ For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8 GB (for XP and XP Pro) and up to 12 GB (for Vista) of system disk is reserved for recovery software.

⁶ LightScribe creates a monochrome image. LightScribe media required and sold separately. Note that DVD-RAM cannot read or write to 2.6 GB single-sided/5.2 GB double-sided—Version 1.0 media. Don't copy copyright-protected materials.

⁷ Double-layer discs can store more data than single-layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players.
