Coolers in comparison: Dark Rock Pro 2 wins

British online magazine Hardware.info reviewed the Dark Rock Pro 2 and, as we have seen from other reviewers, the editors were thrilled about the be quiet! product. In comparison to the Zalman CNPS12X the Dark Rock Pro 2 was clearly the better choice - with the better performance and an extremely low noise level the Dark Rock Pro 2 advanced to the best-performing cooler Hardware.info ever tested and therefore earned the Gold.

Link: <http://goo.gl/4MauA>

HWBOX Greece is completely sold

HWBOX wasn't really sold in the beginning and thought the Dark Rock Pro 2 is yet another good looking but average cooler. They proved themselves wrong and changed their minds after they saw the test results. They found not only a very good looking product but also one that performed well above the competition and therefore concluded it is among the top three CPU coolers. With an overall score of 9.0 the Dark Rock Pro 2 is an "Editor's pick".

Dark Rock Pro 2 wins Ivy Bridge cooler roundup at Hexus

British site Hexus reviewed seven CPU coolers for Intel's Ivy Bridge platform and came to the conclusion that with the Dark Rock Pro 2 be quiet! delivered the best product among the competitors. The editors are really excited about the excellent performance, the impressive and aesthetic design and of course the extremely low noise level. Dark Rock Pro 2 receives four out of five stars, the Editor's Choice award and wins first place at the roundup.

Link: <http://goo.gl/zcRpK>

Dark Rock Pro 2 at bit-tech

British online magazine bit-tech tested the Dark Rock Pro 2 and was very content with it. The improved version of the Dark Rock Pro convinced the editors with its great performance and extremely low noise level.

Link: <http://goo.gl/pkizB>

Gold award for Dark Rock Pro 2

The Dark Rock Pro 2 was reviewed in the 03/2012 of issue the Dutch-based Hardware.info print magazine. It was set to compete one on one with a well-known manufacturer. be quiet! clearly wins the battle and receives a gold award in the end.

Link: <http://goo.gl/o7fvq>

Cooler of extremes

U.S. based online site Pro-Clockers took be quiet!'s cooling flagship for a spin and noticed that it is a cooler worthy of superlatives- in terms of size, performance and low noise level. That's why they awarded it as "Highly Recommended"

Link: <http://goo.gl/nhEHb>

Unboxing video of Dark Rock PRO 2

British video blogger BamDanUK did an unboxing video of the Dark Rock PRO 2 and is really fascinated by the cooler. The first impression of the Dark Rock PRO 2 is very good - he really likes the design and the build quality. BamDanUK will also publish an extensive video review in a few weeks.

Link: <http://goo.gl/gizZr>

Dark Rock PRO 2 knows how to impress HWMaster

The editors at HWMaster are totally sold on the performance, design and compatibility of the Dark Rock PRO 2 CPU cooler. It fits on all sockets out there and is their preferred choice when it comes to overclocking and silent cooling.

Link: <http://goo.gl/XBWle>

Dark Rock Pro 2 reviewed by TweakTown

International online magazine TweakTown reviewed the Dark Rock Pro 2 and gave it their "Must have - best performance" award. They like the great performance and ultra low noise and find nothing negative about the cooler. They recommend it to users who desire great performance with "little to no noise".

Link: <http://goo.gl/ZLRQs>

Unboxing & review from german vlogger

German video blogger Igellce84 decided to examine the Dark Rock Pro 2 in front of the camera.

Link: <http://goo.gl/a0U5M>

"Cooling performance is far superior than others"

German editors from Tomshardware decided to grab a Dark Rock Pro 2 and take it for a spin on their testing system. In the end they come to the conclusion, that the cooler lives up to all of its expectations.

Link: <http://goo.gl/DQngU>

"Unrivaed in terms of quality"

The highly respected Computerbase is one of the biggest German online sites for computer hardware. So naturally they were interested in reviewing the new Dark Rock Pro 2. They recently received a Dark Rock Pro 2 and put it through their tests. They praised its performance, build quality and silence.

Link: <http://goo.gl/MV6j1>

Dark Rock Pro 2 - "monster cooler"

Hardwareluxx community user Cartago2202 reviewed the be quiet! Dark Rock Pro 2 and gave it his gold award. He praised the great build quality, the low noise fans, the various mounting possibilities and the awesome cooling performance.

Link: <http://goo.gl/VDOkA>

Dark Rock Pro 2 "at a very high level" in terms of quality and performance

German online magazine Hardware.net reviewed the be quiet! Dark Rock Pro 2 and came to a very positive conclusion. They not only praise the high quality and extraordinary design but also the extremely low noise level and improved installation method. The Dark Rock Pro 2 earned their "Top Product" award.

Link: <http://goo.gl/rYWvU>

Convincing: Dark Rock Pro 2

German online magazine Gamezoom reviewed the new Dark Rock Pro 2 and gave the high end cooler nine out of ten possible points. The Dark Rock Pro 2 was praised particularly for its broad compatibility, high build quality, enormous cooling power and low noise levels.

Link: <http://goo.gl/fKxo7>

"High-quality package with exceptional good looks"

German online magazine hardwaremax has reviewed the new Dark Rock Pro 2. They praised the high quality and the great compatibility as well as the ultra-quiet fans from be quiet!. From all tested twin tower coolers the Dark Rock Pro 2 offers "one of the best overall packages" combining heatsink and fans, report the editors. Accordingly, they awarded the Dark Rock Pro 2 both a Gold Award and a Silent Award.

Link: <http://goo.gl/HIAR4>

be quiet!'s new CPU coolers amaze SweClockers

be quiet!'s new Dark Rock 2 coolers are a hot commodity in Sweden. Reason enough for SweClockers to introduce the coolers in their weekly show as product of the week. The editors from Sweden's most respected test website are very pleased with the changes be quiet! made to the original design to make them even better performing and easier to install.

Link: <http://goo.gl/Cp85Z>

Dark Rock Pro 2 vs. Noctua NH-D14

Dedicated forum user "Mr joker" from the German Hardwareluxx community took a close look at two highly rated models of recent double tower CPU coolers and compared them. Namely these products would be the be quiet! Dark Rock Pro 2 and the Noctua NH-D14. He found that, even though these coolers have a lot in common, be quiet! was the clear winner of the head-to-head comparison.

Link: <http://goo.gl/1TUIa>

Dark Rock 2 Pro is worth buying, for sure

British editors from Kit Guru grabbed one of the brand new Dark Rock Pro 2 coolers from be quiet! and mounted it on top of the new Ivy Bridge processors from Intel. Results were impressive, since they reached 4,7 GHz with a Core i7-3770K, still maintaining a decent noise level. So in the end the Dark Rock Pro 2 got 8,5 out of 10 points and a "worth buying" award.

Link: <http://goo.gl/RMXIR>

"Excellent noise level to performance ratio"

German online magazine took a look at the Dark Rock Pro 2 and was really excited about the product. They praise the "excellent quality", the design, performance and low noise level. In the end the Dark Rock Pro 2 receives the editor's choice award.

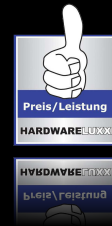

Link: <http://goo.gl/U1Plk>

Big dualtower cooler roundup at Hardwareluxx

German online site Hardwareluxx decided to take a look at high end air coolers. Therefore they compared five dualtower versions against another. Among them was be quiet!'s brand new Dark Rock Pro 2. It managed to perform very well and got a price-performance award in the end.

Link: <http://goo.gl/XTbMr>

Dark Rock Pro considered a "bang for buck" cooler

British online site eTeknix reviewed the be quiet! Dark Rock Pro C1 and considered it a "bang for buck" cooler. The editors really appreciated the great cooling performance, though be quiet! "only" uses 6 mm heatpipes. They also liked the low noise output and the competitive price tag. Concludingly they give the "aesthetically pleasing" cooler their "Bang For Buck" award.

Link: <http://goo.gl/CnFM>

Ten coolers in PCGH roundup

German print magazine PC Games Hardware did a big roundup with 10 recent air coolers in their 05/12 issue. Among them were three be quiet! coolers: the Dark Rock Pro 2, Dark Rock 2 and the Shadow Rock Topflow SR1. All of them managed to compete well and received nice compliments.

Link: <http://goo.gl/GySpC>

Design and Silence awards for Dark Rock Pro C1

Editors at Polish online magazine InfoBIT reviewed the Dark Rock Pro C1 in comparison to a Noctua model. The Dark Rock was considered as very quiet and left no chance to his competitor in this area. Among many other advantages the editors praised the high quality and the fantastic fans.

Link: <http://goo.gl/7NQGI>

Dark Rock Pro 2 briefly looked upon

The new Dark Rock Pro 2 barely made it into the 04/12 issue of PC Games Hardware, so editors did not give out any scores yet, but they wrote some promising words already.

Link: <http://goo.gl/GySpC>

C't compares five high end coolers

Germany's famous print magazine C't did a review of five high end tower coolers for recent quad- and hexacore processors. Among them was the be quiet! Dark Rock Pro and it received a very good resumé.

Link: <http://goo.gl/GySpC>

"Be Quiet! now selling CPU coolers, too"

In issue 10/2011 German print magazine C't mentions be quiet! in their section "Hardware notes". This is a place where they write about small new developments within the industry, such as be quiet! now dealing in CPU coolers, too.

Link: <http://goo.gl/GySpC>

Dual tower coolers got tested in the Netherlands

Dutch online magazine Tweakers.net did a roundup on three dual tower coolers. One of the contestants was the be quiet! Dark Rock Pro. Even though it only scored second in terms of cooling performance, it did win when it came to noise leveles. Therefore it received a "Good"-Award.

Link: <http://goo.gl/gwGa4>

20 opponents versus be quiet! coolers

Dutch print magazine PCM did a big cooler roundup in their september issue. They compared 22 coolers, two of which were be quiet!'s Dark Rock Pro and Dark Rock Advanced. In the end, the Advanced managed to receive an "Beste Product" award, and both got a good resumé for beeing really silent.

Link: <http://goo.gl/o7fvq>

Good coolers for hot days

Even though this year's summer is somewhat disappointing so far, Planet3DNow tried to figure out, which cooler copes best with ambient temperatures above 30 °C. This is the scenario where one can divide good coolers from bad coolers. The magazine took a look at nine high-end representants and the Dark Rock Pro knew to satisfy the editors.

Link: <http://goo.gl/awRmG>

Dark Rock Advanced and Pro compete against each other

French online magazine Hardware.fr took a look at ten recent air coolers with single- and dual-tower design. So be quiet! was able to participate with both coolers, the Dark Rock Advanced and Dark Rock Pro. Both of them made a good appearance throughout the test.

Link: <http://goo.gl/8ISYI>

Ahead of opponents in a roundup

The Dark Rock Pro cooler used to be in nearly all German media, except for Allround-PC. But that's only because editors were missing some competition. So now they compared the be quiet! cooler against products from Scythe and NZXT. In the end, the Dark Rock Pro was way ahead of the other contestants and got a recommendation.

Link: <http://goo.gl/VR7De>

Dark Rock Pro is "Worth Buying"

British editors from Kitguru took a look at be quiet's cooling flagship, the Dark Rock Pro. They liked it because of its good performance and the nice look. Finally they awarded it "Worth Buying" and gave away 8 out of 10 points.

Link: <http://goo.gl/vpmrl>

Dark Rock Pro offers "Stellar Performance"

For the fourth time within four weeks, VR-Zone reviews a be quiet product. This time they picked the cooling flagship Dark Rock Pro. And again they seem to like german engineering, since the cooler gets maximum points in nearly all categories. In the end it's an amazing 9,5 out of 10 points and therefore it receives a "Stellar Performance" award.

Link: <http://goo.gl/0wpR0>

"One of the best CPU coolers we've tested."

In their september issue, Custom PC once again recommends the be quiet! Dark Rock Pro. Next to a list of the best hardware components on the market right now, there is another list with surrounding components like power supplies, cases and coolers. Dark Rock Pro made it into the list and was called "One of the best CPU coolers we've tested."

English recommendation for Dark Rock Advanced

Not only did the editors from VR-Zone like the be quiet! power supplies but they also fancy the new Dark Rock Advanced cpu cooler. It got a final score of 8,5 and in terms of quality it even scored maximum 10 out of 10 points. With this review comes a "Good design" award.

Link: <http://goo.gl/IVAWL>

Remarkable entrance into the cooling market

One of the last german online magazines to review the Dark Rock Pro cooler was Au-Ja. When they finally did take a look at the Dark Rock Pro, they were quite amazed and gave away a "very good"-Award, as well as some nice words on the product.

Link: <http://goo.gl/KDqKV>

Another Gold for Dark Rock Pro

Double towercooler Dark Rock Pro could gain a "Gold award" at german online-magazine Caseumbau. Even though they are using a very specific teststation which is not using a real processor but a heating-element instead. They can reproduce any value of thermal design power.

Link: <http://goo.gl/zXKMR>

be quiet! cooling-family on video

PC-Max took their chance and grabbed both new CPU coolers from be quiet! to review them. In the end, both of them made a great impression on the editor. PC-Max is one of the few magazines, where there is always a video in their reviews. There's also one on the be quiet! coolers.

Link: <http://goo.gl/86IZ5>

be quiet Dark Rock Pro wins 4 out of 5 stars

British site XSReviews.co.uk awards the be quiet! Dark Rock Pro C1 with 4 out of 5 stars, for excellent, inaudible performance, packed in a monstreous black heatsink.

Link: <http://goo.gl/X3NUj>

Tom's Hardware: air- vs. watercooling

Watercoolers have seen huge improvements over the years and are easier and cheaper than ever. So they are a real threat for aircoolers these days. Fair enough, Tom's Hardware compared some products of both categories and found nice words for the be quiet! Dark Rock Pro.

Link: <http://goo.gl/Qa4BM>

From zero to the top

German magazine Gamezoom.net always takes a good look on be quiet! products, and so they got hold of the new Dark Rock Pro, too. In the end, the cooler reached nine out of ten possible points and therefore got rewarded as "High End".

Link: <http://goo.gl/uiAxQ>

Dark Rock Pro at Computerbase

The newest cooler from be quiet!, called Dark Rock Pro, has finally been reviewed by Germany's big online magazine Computerbase.de. As they are well known for their good testing methods, be quiet! was even happier to receive a lot of nice words and the editor's recommendation!

Link: <http://goo.gl/EvzeX>

"Fancy, universal giant"

Even though there is a lot of press feedback concerning be quiet!'s entrance into the cooling market, the company still loves to hear the customer's opinions. Therefore be quiet! cooperates with some well known community members of big german hardware forums and delivers them with test samples. This time, a user named "Silencio" from the Computerbase forum found some very pleasing words for the Dark Rock Pro.

Link: <http://goo.gl/LHQYx>

Dark Rock Pro at Dexgo

German online magazine Dexgo wanted to take a closer look at be quiet!'s new cooler flagship. No sooner said than done! The review of the Dark Rock Pro is quite positive and in the end the cooler could even receive a silver award!

Link: <http://goo.gl/EEkd0>

Flagship on user's test bench

With nearly 6000 posts, user "xTc" is one of the most experienced members of the PC Games Hardware Extreme community. He got hold of one Dark Rock Pro and rated it really good.

Link: <http://goo.gl/lknqU>

Well done premiere for Dark Rock Pro

Technic3D is one veteran site below german online magazines. Since about ten years the team keeps their readers posted with daily news and articles from the IT-scene. The more important is their positive judgement and the silver award they handed out to the new Dark Rock^{Pro} cpu cooler.

Link: <http://goo.gl/x3Tu7>

Black and evil

The Dark Rock^{Pro} CPU cooler got reviewed by german Tech-Review.de. The result is quite satisfying: nice resume and a "Very good"-award

Link: <http://goo.gl/1VHDm>

Hardware.Info tested both new be quiet! coolers

Dutch online magazine Hardware.info was eager to review all of be quiet!'s new cpu coolers, so they did this in one article and were very pleased in the end.

Link: <http://goo.gl/glx2>

Trio of twin-tower-coolers tested

German user "elohim" already took a look at the Dark Rock Advanced and compared it to its opponents. But now he's doing the same thing with the Dark Rock Pro. This time there are also two opponents, and the Dark Rock Pro receives a pretty decent resumé.

Link: <http://goo.gl/6wO4e>
