- Aluminum metal grill
- Designed to fit with iMac and PC

Advanced intuitive control

- Dock any iPod/iPhone, even in its case
- AUX-in for easy connection to almost any electronic device
- PC synchronization with your iPod/iPhone
- Free DockStudio app for internet radio & other cool feature

PHILIPS

Highlights

Digital Sound Processing

Advanced sound processing technology enhances the reproduction of your music so that each note resonates with crystal-clear accuracy, and each pause is sealed with pristine silence. Philips' proprietary Digital Sound Processing technology optimizes the performance of compact speaker boxes, delivering sound that is clear, detailed and powerful without any distortion.

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music

throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Aluminum metal grill

Premium build quality design. The speakers front is made from a single piece of anodized brushed aluminum - the same material used to build aircraft. The aluminum, curved to create an ideal acoustic chamber, optimizes audio delivery for sound that is accurate, powerful, natural and crystal clear.

DockStudio app on App Store

The free app adds an array of exclusive cool features to your docking speaker. You can check the weather, tell the time and even use your favorite images as wallpaper. DockStudio also lets you listen to thousands of Internet radio stations worldwide. More updates on skin styles and new functions on the way.

Specifications
