

Philips SENSEO® Viva Café

The fine SENSEO® coffee selection and the unique SENSEO® brewing system make sure that your perfect cup of coffee always comes with a rich and delicious coffee foam layer-proof of premium taste and quality. Your SENSEO® coffee machine automatically switches off after 30 minutes, allowing you to save energy. The plastic in contact with water and coffee is free of bisphenol A. The cardboard packaging material contains a minimum of 90% recycled content. The plastic housing of the SENSEO® Viva Café contains up to 112 gram recycled plastic.

Our eco passport*

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.

Energy

- Energy Label**:
- Max power consumption: 1450W
- Annual energy consumption: 93kWh*
- Standby energy consumption: 0.36 W
