1. Important

This electronic user's guide is intended for anyone who uses the Philips monitor. Take time to read this user manual before you use your monitor. It contains important information and notes regarding operating your monitor.

The Philips guarantee applies provided the product is handled properly for its intended use, in accordance with its operating instructions and upon presentation of the original invoice or cash receipt, indicating the date of purchase, dealer's name and model and production number of the product.

1.1 Safety precautions and maintenance

Warnings

Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

Read and follow these instructions when connecting and using your computer monitor.

Operation

- Please keep the monitor out of direct sunlight, very strong bright lights and away from any other heat source. Lengthy exposure to this type of environment may result in discoloration and damage to the monitor.
- Remove any object that could fall into ventilation holes or prevent proper cooling of the monitor's electronics.
- Do not block the ventilation holes on the cabinet.
- When positioning the monitor, make sure the power plug and outlet are easily accessible.
- If turning off the monitor by detaching the power cable or DC power cord, wait for 6 seconds before attaching the power cable or DC power cord for normal operation.

- Please use approved power cord provided by Philips all the time. If your power cord is missing, please contact with your local service center. (Please refer to Customer Care Consumer Information Center)
- Do not subject the monitor to severe vibration or high impact conditions during operation.
- Do not knock or drop the monitor during operation or transportation.

Maintenance

- To protect your monitor from possible damage, do not put excessive pressure on the LCD panel. When moving your monitor, grasp the frame to lift; do not lift the monitor by placing your hand or fingers on the LCD panel.
- Unplug the monitor if you are not going to use it for an extensive period of time.
- Unplug the monitor if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your monitor.
- To avoid the risk of shock or permanent damage to the set, do not expose the monitor to dust, rain, water, or excessive moisture environment.
- If your monitor gets wet, wipe it with dry cloth as soon as possible.
- If foreign substance or water gets in your monitor, please turn the power off immediately and disconnect the power cord. Then, remove the foreign substance or water, and send it to the maintenance center.
- Do not store or use the monitor in locations exposed to heat, direct sunlight or extreme cold.
- In order to maintain the best performance of your monitor and use it for a longer lifetime, please use the monitor in a location that falls within the following temperature and humidity ranges.

1. Important

- Temperature: 0-40°C 32-95°F
- Humidity: 20-80% RH

Important information for Burn-in/Ghost image

- Always activate a moving screen saver program when you leave your monitor unattended. Always activate a periodic screen refresh application if your monitor will display unchanging static content. Uninterrupted display of still or static images over an extended period may cause "burn in", also known as "after-imaging" or "ghost imaging", on your screen.
- "Burn-in", "after-imaging", or "ghost imaging" is a well-known phenomenon in LCD panel technology. In most cases, the "burned in" or "after-imaging" or "ghost imaging" will disappear gradually over a period of time after the power has been switched off.

Warning

Failure to activate a screen saver, or a periodic screen refresh application may result in severe "burn-in" or "after-image" or "ghost image" symptoms will not disappear and cannot be repaired. The damage mentioned above is not covered under your warranty.

Service

- The casing cover should be opened only by qualified service personnel.
- If there is any need for any document for repair or integration, please contact with your local service center. (please refer to the chapter of "Consumer Information Center")
- For transportation information, please refer to "Technical Specifications".
- Do not leave your monitor in a car/trunk under direct sun light.

Note

Consult a service technician if the monitor does not operate normally, or you are not sure what procedure to take when the operating instructions given in this manual have been followed.

1.2 Notational Descriptions

The following subsections describe notational conventions used in this document.

Notes, Cautions and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold or italic type. These blocks contain notes, cautions or warnings. They are used as follows:

Note

This icon indicates important information and tips that help you make better use of your computer system.

Caution

This icon indicates information that tells you how to avoid either potential damage to hardware or loss of data.

Warning

This icon indicates the potential for bodily harm and tells you how to avoid the problem.

Some warnings may appear in alternate formats and may not be accompanied by an icon. In such cases, the specific presentation of the warning is mandated by the relevant regulatory authority.

1.3 Disposal of product and packing material

Waste Electrical and Electronic Equipment- WEEE

This marking on the product or on its packaging illustrates that, under European Directive 2002/96/EC governing used electrical and electronic appliances, this product may not be disposed of with normal household waste. You are responsible for disposal of this equipment through a designated waste electrical and electronic equipment collection. To determine the locations for dropping off such waste electrical and electronic, contact your local government office, the waste disposal organization that serves your household or the store at which you purchased the product.

Your new monitor contains materials that can be recycled and reused. Specialized companies can recycle your product to increase the amount of reusable materials and to minimize the amount to be disposed of.

All redundant packing material has been omitted. We have done our utmost to make the packaging easily separable into mono materials.

Please find out about the local regulations on how to dispose of your old monitor and packing from your sales representative.

Recycling Information for Customers

Your display is manufactured with high quality materials and components which can be recycled and reused.

To learn more about our recycling program please visit www.philips.com/about/sustainability/recycling.

2. Setting up the monitor

2.1 Installation

1 Package contents

USB Cable (Y Type)

2 Install base stand

1. Place the monitor face down on a soft and smooth surface to avoid scratching or damaging the screen.

2. Hold the monitor base stand with both hands and firmly insert the base stand into the base column.

3. Attach the monitor base stand to the base column then fasten base stand.

⚠ Caution

Do not release the height adjustment pin lock from the base column before the base stand is firmly fixed.

2. Setting up the monitor

3 Connecting to your laptop

- ❶ Kensington anti-theft lock
- ❷ USB connection
- ❸ 5V/3A AC to DC adaptor (Optional)
DSA-20PFE-05 FEU 050300
DSA-20PFE-05 FCH 050300
DSA-20PFE-05 FUS 050300
Specification:100-240VAC, 50/60Hz (Input),
0.7A; 5VDC, 3A (Output)
Manufacturer:DEE VAN ENTERPRISE CO.,
LTD.

Note

Please note that the DisplayLink software has to be installed in your laptop before you start to use the USB monitor:

Connect to laptop

1. Install Display link software in your laptop.
2. Connect the supplied USB “Y” cable between your laptop and monitor:The single connector side connects to the Monitor; and the “Y” dual side connector to the laptop.
3. The USB monitor will be recognized by the OS, and will automatically turn on after windows installs the driver:
4. USB monitor is ready to be used as second monitor
5. Both “Y” connectors should be connected to the 2xUSB ports of your laptop to ensure enough stable power is supplied to the monitor:

Note

1. You may have to re-boot your laptop in order to recognize the USB monitor correctly.
2. Many new laptops may be able to supply enough power with only 1x USB port, in that case you may wish to free up 1x USB port if required. If you find that the display flickers with 1xUSB connection, or does not light up, then please ensure that 2xUSB ports are utilized.
3. In rare instances, your laptop's 2xUSB ports may not have enough power output for the monitor; In that case you may need to purchase an optional DC adaptor:

Philips part number	Description	Model of adaptor
<u>080G L19 41DV1</u>	CONSIGN ADAPTER 5V 15W CHINA	DSA-20PFE-05 FCH 050300
<u>080G L19 41DV2</u>	CONSIGN ADAPTER 5V/3A 15W USA	DSA-20PFE-05 FUS 050300
<u>080G L19 41DV3</u>	CONSIGN ADAPTER 5V 15W EUROPE	DSA-20PFE-05 FEU 050300

Please contact www.philips.com/support or Local Monitor Help Desk for the details.

4. Note that the USB monitor cannot be connected as a primary monitor to a stand-alone PC

Warning

Never remove covers unless qualified to do so, This unit contains dangerous voltages. Use only DC Adapter listed in the user instruction.

2. Setting up the monitor

3 Resolution notification

This monitor is designed for optimal performance at its native resolution, 1920 × 1080 @ 60 Hz.

4 Physical Function

Tilt

Swivel

Height adjustment

Note

Remove the height adjustment pin lock before adjusting the height.

Insert the height adjustment pin lock before lifting the monitor.

2.2 Remove Base Stand and Base

1 Remove the Base Stand

Before you start disassembling the monitor base, please follow the instructions below to avoid any possible damage or injury.

1. Extend the monitor base to its maximum height.

2. Place the monitor face down on a soft and smooth surface to avoid scratching or damaging the screen.

3. Release the lock of base stand then pull the base stand away from the base column.

2. Setting up the monitor

2 Remove the base

Condition:

- For VESA standard mounting applications.

1. Remove the 8 screw covers.

2. Remove the 4 screws and then remove the base from the monitor:

Note

This monitor accepts a 100mm x 100mm VESA-Compliant mounting interface.

3. USB monitor operation

3.1 Introduction

USB monitor allows you to share the images between your laptop and the monitor by simply connecting USB cable to your laptop. No extra power cord or video cables are required, resulting in a simple, single cable, ultra low power connection between your laptop and monitor.

3.2 DisplayLink Graphics Software Installation

In order to use your USB monitor as a secondary display, DisplayLink Graphic software is required to be installed in your Windows system. Moreover, the software allows you to easily control your preference when viewing images. The driver is compatible with Microsoft Windows systems including Microsoft Windows 7, Vista and XP. Please note that this display will not work in DOS.

The installation procedure:

1. Double click Setup.exe file in CD disk enclosed, then the User Account Control window pops-out. (if enabled in the OS)

2. Click Yes, then DisplayLink software end user license agreement window opens.

3. Click I Accept, then software start to install

Note

The screen may flash or go black during the installation. The installation box above will disappear but no message will be shown at the end of the installation.

4. After the software is installed completely, connect your USB monitor to your laptop with USB cable and then below "Found new device" will be shown on the taskbar.

5. When the device is found, then DisplayLink Graphics will automatically install.
6. After the installation has completed, your laptop will require to reboot the system in order to start to use the USB monitor.
7. You will be able to see pictures on the USB monitor after Windows completes bootup process.

3.3 How to control the display

1 Windows 7 system

On Windows 7, you can configure a DisplayLink device through the use of Windows Display Properties (WDP). WDP provides a simple method to attach, rotate, duplicate or extend screens as well as modify screen resolution.

1. To open WDP

There are several ways to open WDP.

A	B	C
1. Right-click on the desktop.	1. From Start menu > Devices and Printers.	1. Right click on the DisplayLink icon  .
2. Select Screen Resolution from the menu.	2. Double-click the DisplayLink device icon.	2. Click Advanced Configuration.
3. WDP opens.	3. WDP opens.	3. WDP opens.

2. Setting the Display

Follow this procedure to set the display.

To set the display

- 2.1. Open Screen Resolution.
- 2.2. Set the display options. Refer to the table below for details on each option.

Menu Option	Sub-menu Option	Description
Display		Use the drop down list to select a display to be configured.
Resolution		Use the drop down list and user the slider to choose a resolution.
Orientation (Use this function if you upgrade with Ergonomics base)	Landscape	Sets the display to landscape view
	Portrait	Sets the display to portrait mode
	Landscape (flipped)	Sets the display to upside down landscape mode
	Portrait (flipped)	Sets the display to upside down portrait mode
Multiple displays	Duplicates these displays	Reproduces the main display on the second display.
	Extend these displays	Extends the main display onto the secondary display.
	Show Desktop only on 1	The desktop appears on the display marked 1.The display marked 2 becomes blank.
	Shows Desktop only on 2	The desktop appears on the display marked 2.The display marked 1 becomes blank.

Table 1:WDP Options

To control the behaviour of an attached DisplayLink display, it is also possible to use Windows key+P to display the menu (and cycle through it) to switch mode.

3. To control the Display

- 3.1. Select the Windows key+P.The following menu appears.

- 3.2. Click on one of the options.The display updates to reflect your choice.

The DisplayLink icon application

You can configure the behaviour of the DisplayLink USB Graphics through the DisplayLink icon application on the taskbar, where present.

3. USB monitor operation

4. To show the DisplayLink Manager menu
- 4.1. From the taskbar, click the show hidden icons arrow to show all available icons.

- 4.2. Click the DisplayLink icon , menu appears with several options as below

Refer to the table below for details on each option:

Menu	Description
DisplayLink Manager	Opens the Windows display setting window.
Check for updates	Connects to the Windows update and checks for newer versions and downloads them, if available.
Optimize for Video	Select this option for better movie playback performance on the DisplayLink enabled displays. Only select this option when playing back video content. Note: Text may appear less clear when enabled.
Fit to TV	If the Windows desktop does not completely appear on the monitor; this option can be used to adjust the size of the Windows desktop (The resolution of screen).
Advanced Configuration	Opens the Windows Display Properties (WDP).

3. USB monitor operation

2 Windows Vista and Windows XP system

When USB monitor is attached to your laptop with Windows Vista and Windows XP system, a DisplayLink icon appears in the taskbar. This provides the access to the DisplayLink Manager menu.

To use the DisplayLink Manager menu

1. Click the DisplayLink icon  on the taskbar:

The menu appears as shown below.

2. Refer to the table below for details on each option.

Menu Option	Sub-menu Option	Description
DisplayLink Manager		Opens the Windows display setting window.
Updates	Check Now	Connects to the update server to check for newer driver versions and downloads them, if available.
	Configure	Opens the update options window where you can configure automatic updates.
Screen Resolution		Displays a list of available resolutions (1920 × 1080). This option is not available in mirror mode, as the resolution is defined as the resolution of the main monitor.
Screen Rotation (Use this function if you upgrade with Ergonomics base)	Normal	No rotation is applied to the DisplayLink display.
	Rotated Left	Rotates the extended or mirrored display by 270 degrees.
	Rotated Right	Rotates the extended or mirrored display by 90 degrees.
	Upside-Down	Rotates the extended or mirrored display by 180 degrees.

3. USB monitor operation

Menu Option	Sub-menu Option	Description
Extend To	Right	Extends the display to the right of the main display.
	Left	Extends the display to the left of the main display.
	Above	Extends the display above of the main display.
	Below	Extends the display below the main display.
Extend		Extends your desktop onto the secondary display.
Set as Main Monitor		Sets the secondary display as the main display.
Notebook Monitor Off		Switches off the display of an attached notebook and makes the DisplayLink display primary.
Mirror		Copies what is on the main display and reproduces it on the secondary display
Off		Switches off the secondary display
Optimize for Video (Vista and Windows 7 Only)		Select this option for better movie playback performance on the DisplayLink enabled displays. Only select this option when playing back video content. Note: Text may appear less clear when enabled.
Fit to TV		If the Windows desktop does not completely appear on the monitor, this option can be used to adjust the size of the Windows desktop. See "Fit to TV" for details on how to configure this feature (The resolution of screen).

Note

Please visit DisplayLink website <http://www.displaylink.com/support/downloads.php> for more detailed DisplayLink software updated information.

4. Technical Specifications

Color	Black/Black, Silver/Black
Finish	Texture

Note

1. This data is subject to change without notice. Go to www.philips.com/support to download the latest version of leaflet.

4.1 Resolution & Preset Modes

1 Recommended Resolution

1920 × 1080 @ 60 Hz

Note

The USB monitor works with USB 2.0 480 Mbps.

5. Regulatory Information

Lead-free Product

Lead free display promotes environmentally sound recovery and disposal of waste from electrical and electronic equipment. Toxic substances like Lead has been eliminated and compliance with European community's stringent RoHs directive mandating restrictions on hazardous substances in electrical and electronic equipment have been adhered to in order to make Philips monitors safe to use throughout its life cycle.

CE Declaration of Conformity

This product is in conformity with the following standards

- EN60950-1:2006 (Safety requirement of Information Technology Equipment).
- EN55022:2006 (Radio Disturbance requirement of Information Technology Equipment).
- EN55024:1998+A1:2001+A2:2003 (Immunity requirement of Information Technology Equipment).
- EN61000-3-2:2006 (Limits for Harmonic Current Emission).
- EN61000-3-3:1995+A1:2001+A2:2005 (Limitation of Voltage Fluctuation and Flicker) following provisions of directives applicable.
- 2006/95/EC (Low Voltage Directive).
- 2004/108/EC (EMC Directive).
- 2005/32/EC (EuP Directive, EC No. 1275/2008 implementing Directive for Standby and Off mode power consumption) and is produced by a manufacturing organization on ISO9000 level.

Federal Communications Commission (FCC) Notice (U.S. Only)

- ⓘ This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- ⚠ Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

5. Regulatory Information

Use only RF shielded cable that was supplied with the monitor when connecting this monitor to a computer device.

To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

THIS CLASS B DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE-CAUSING EQUIPMENT REGULATIONS.

FCC Declaration of Conformity

Declaration of Conformity for Products Marked with FCC Logo,

United States Only

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Commission Federale de la Communication (FCC Declaration)

☞ Cet équipement a été testé et déclaré conforme aux limites des appareils numériques de classe B, aux termes de l'article 15 Des règles de la FCC. Ces limites sont conçues de façon à fournir une protection raisonnable contre les interférences nuisibles dans le cadre d'une installation résidentielle.

CET appareil produit, utilise et peut émettre des hyperfréquences qui, si l'appareil n'est pas installé et utilisé selon les consignes données, peuvent causer des interférences nuisibles aux communications radio.

Cependant, rien ne peut garantir l'absence d'interférences dans le cadre d'une installation particulière. Si cet appareil est la cause d'interférences nuisibles pour la réception des signaux de radio ou de télévision, ce qui peut être décelé en fermant l'équipement, puis en le remettant en fonction, l'utilisateur pourrait essayer de corriger la situation en prenant les mesures suivantes:

- Réorienter ou déplacer l'antenne de réception.
 - Augmenter la distance entre l'équipement et le récepteur.
 - Brancher l'équipement sur un autre circuit que celui utilisé par le récepteur.
 - Demander l'aide du marchand ou d'un technicien chevronné en radio/télévision.
- ❗ Toutes modifications n'ayant pas reçu l'approbation des services compétents en matière de conformité est susceptible d'interdire à l'utilisateur l'usage du présent équipement.

N'utiliser que des câbles RF armés pour les connections avec des ordinateurs ou périphériques.

CET APPAREIL NUMERIQUE DE LA CLASSE B RESPECTE TOUTES LES EXIGENCES DU REGLEMENT SUR LE MATERIEL BROUILLEUR DU CANADA.

EN 55022 Compliance (Czech Republic Only)

This device belongs to category B devices as described in EN 55022, unless it is specifically stated that it is a Class A device on the specification label. The following applies to devices in Class A of EN 55022 (radius of protection up to 30 meters). The user of the device is obliged to take all steps necessary to remove sources of interference to telecommunication or other devices.

Pokud není na typovém štítku počítáno uvedeno, že spadá do třídy B podle EN 55022, spadá automaticky do třídy B podle EN 55022. Pro zařízení zařazená do třídy A (chranné pásmo 30m) podle EN 55022 platí následující. Dojde-li k rušení telekomunikačních nebo jiných zařízení je uživatel povinen provést takové opatření, aby rušení odstranil.

Polish Center for Testing and Certification Notice

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer; monitor; printer; and so on) should have the same power supply source.

The phasing conductor of the room's electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark "B" confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/E-06251.

Wymagania Polskiego Centrum Badań i Certyfikacji

Urządzenie powinno być zasilane z gniazda z przyłączonym obwodem ochronnym (gniazdo z kolkiem). Współpracujące ze sobą urządzenia (komputer, monitor, drukarka) powinny być zasilane z tego samego źródła.

Instalacja elektryczna pomieszczenia powinna zawierać w przewodzie fazowym rezerwową ochronę przed zwarciami, w postaci bezpiecznika o wartości znamionowej nie większej niż 16A (amperów).

W celu całkowitego wyłączenia urządzenia z sieci zasilania, należy wyjąć wtyczkę kabla zasilającego z gniazda, które powinno znajdować się w pobliżu urządzenia i być łatwo dostępne.

Znak bezpieczeństwa "B" potwierdza zgodność urządzenia z wymaganiami bezpieczeństwa użytkowania zawartymi w PN-93/T-42107 i PN-89/E-06251.

Pozostałe instrukcje bezpieczeństwa

- Nie należy używać wtyczek adapterowych lub usuwać kolka obwodu ochronnego z wtyczki. Jeżeli konieczne jest użycie przedłużacza to należy użyć przedłużacza 3-żyłowego z prawidłowo połączonym przewodem ochronnym.
- System komputerowy należy zabezpieczyć przed nagłymi, chwilowymi wzrostami lub spadkami napięcia, używając eliminatora przepięć, urządzenia dopasowującego lub bezzakłócenowego źródła zasilania.
- Należy upewnić się, aby nie było połączenia między kablami systemu komputerowego, oraz aby kable nie były umieszczone w miejscu, gdzie można byłoby na nie nadepnąć lub pochylić się o nie.
- Nie należy rozlewać napojów ani innych płynów na system komputerowy.
- Nie należy wypychać żadnych przedmiotów do otworów systemu komputerowego, gdyż może to spowodować pożar lub porażenie prądem, poprzez zwarcie elementów wewnętrznych.
- System komputerowy powinien znajdować się z dala od grzejników i źródeł ciepła. Ponadto, nie należy blokować otworów wentylacyjnych. Należy unikać kładzenia luźnych papierów pod komputer oraz umieszczania komputera w ciasnym miejscu bez możliwości cyrkulacji powietrza wokół niego.

Ergonomie Hinweis (nur Deutschland)

Der von uns gelieferte Farbmonitor entspricht den in der "Verordnung über den Schutz vor Schäden durch Röntgenstrahlen" festgelegten Vorschriften.

Auf der Rückwand des Gerätes befindet sich ein Aufkleber, der auf die Unbedenklichkeit der Inbetriebnahme hinweist, da die Vorschriften über die Bauart von Störstrahlern nach Anlage III α 5 Abs. 4 der Röntgenverordnung erfüllt sind.

Damit Ihr Monitor immer den in der Zulassung geforderten Werten entspricht, ist darauf zu achten, daß

1. Reparaturen nur durch Fachpersonal durchgeführt werden.
2. nur original-Ersatzteile verwendet werden.
3. bei Ersatz der Bildröhre nur eine bauartgleiche eingebaut wird.

Aus ergonomischen Gründen wird empfohlen, die Grundfarben Blau und Rot nicht auf dunklem Untergrund zu verwenden (schlechte Lesbarkeit und erhöhte Augenbelastung bei zu geringem Zeichenkontrast wären die Folge). Der arbeitsplatzbezogene Schalldruckpegel nach DIN 45 635 beträgt 70dB (A) oder weniger.

China RoHS

The People's Republic of China released a regulation called "Management Methods for Controlling Pollution by Electronic Information Products" or commonly referred to as China RoHS. All products including CRT and Monitor which are produced and sold for China market have to meet China RoHS request.

中国大陆RoHS

根据中国大陆《电子信息产品污染控制管理办法》（也称为中国大陆RoHS），以下部分列出了本产品中可能包含的有毒有害物质或元素的名称和含量

本表适用之产品

显示器（液晶及CRT）

有毒有害物质或元素

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr6+)	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
外壳	○	○	○	○	○	○
CRT显示屏	×	○	○	○	○	○
液晶显示屏/灯管	×	○	○	○	○	○
电路板组件*	×	○	○	○	○	○
电源适配器	×	○	○	○	○	○
电源线/连接线	×	○	○	○	○	○

*：电路板组件包括印刷电路板及其构成的零部件，如电阻、电容、集成电路、连接器等

○：表示该有毒有害物质在该部件所有均质材料中的含量均在《电子信息产品中有毒有害物质的限量要求标准》规定的限量要求以下

×：表示该有毒有害物质至少在该部件的某一均质材料中的含量超出《电子信息产品中有毒有害物质的限量要求标准》规定的限量要求；但是上表中打“×”的部件，符合欧盟RoHS法规要求（属于豁免的部分）

环保使用期限

此标识指期限(十年),电子信息产品中含有 的有毒有害物质或元素在正常使用的条件 下不会发生外泄或突变,电子信息产品用户 使用该电子信息产品不会对环境造成严重 污染或对其人身、财产造成严重损害的期 限。

《废弃电器电子产品回收处理管理条例》提示性 说明

为了更好地关爱及保护地球，当用户不再需要此 产品或产品寿命终止时，请遵守国家废弃电器电 子产品回收处理相关法律法规，将其交给当地具 有国家认可的回收处理资质的厂商进行回收处 理。

6. Customer care and warranty

6.1 Philips' Flat Panel Monitors Pixel Defect Policy

Philips strives to deliver the highest quality products. We use some of the industry's most advanced manufacturing processes and practice stringent quality control. However, pixel or sub pixel defects on the TFT Monitor panels used in flat panel monitors are sometimes unavoidable. No manufacturer can guarantee that all panels will be free from pixel defects, but Philips guarantees that any monitor with an unacceptable number of defects will be repaired or replaced under warranty. This notice explains the different types of pixel defects and defines acceptable defect levels for each type. In order to qualify for repair or replacement under warranty, the number of pixel defects on a TFT Monitor panel must exceed these acceptable levels. For example, no more than 0.0004% of the sub pixels on a monitor may be defective. Furthermore, Philips sets even higher quality standards for certain types or combinations of pixel defects that are more noticeable than others. This policy is valid worldwide.

Pixels and Sub pixels

A pixel, or picture element, is composed of three sub pixels in the primary colors of red, green and blue. Many pixels together form an image. When all sub pixels of a pixel are lit, the three colored sub pixels together appear as a single white pixel. When all are dark, the three colored sub pixels together appear as a single

black pixel. Other combinations of lit and dark sub pixels appear as single pixels of other colors.

Types of Pixel Defects

Pixel and sub pixel defects appear on the screen in different ways. There are two categories of pixel defects and several types of sub pixel defects within each category.

Bright Dot Defects

Bright dot defects appear as pixels or sub pixels that are always lit or "on". That is, a bright dot is a sub-pixel that stands out on the screen when the monitor displays a dark pattern. There are the types of bright dot defects.

One lit red, green or blue sub pixel.

Two adjacent lit sub pixels:

- Red + Blue = Purple
- Red + Green = Yellow
- Green + Blue = Cyan (Light Blue)

Three adjacent lit sub pixels (one white pixel).

 Note

A red or blue bright dot must be more than 50 percent brighter than neighboring dots while a green bright dot is 30 percent brighter than neighboring dots.

Black Dot Defects

Black dot defects appear as pixels or sub pixels that are always dark or "off". That is, a dark dot is a sub-pixel that stands out on the screen when the monitor displays a light pattern. These are the types of black dot defects.

Proximity of Pixel Defects

Because pixel and sub pixels defects of the same type that are near to one another may be more noticeable, Philips also specifies tolerances for the proximity of pixel defects.

Pixel Defect Tolerances

In order to qualify for repair or replacement due to pixel defects during the warranty period, a TFT Monitor panel in a Philips flat panel monitor must have pixel or sub pixel defects exceeding the tolerances listed in the following tables.

BRIGHT DOT DEFECTS	ACCEPTABLE LEVEL
1 lit subpixel	3
2 adjacent lit subpixels	1
3 adjacent lit subpixels (one white pixel)	0
Distance between two bright dot defects*	>15mm
Total bright dot defects of all types	3

BLACK DOT DEFECTS	ACCEPTABLE LEVEL
1 dark subpixel	5 or fewer
2 adjacent dark subpixels	2 or fewer
3 adjacent dark subpixels	0
Distance between two black dot defects*	>15mm
Total black dot defects of all types	5 or fewer

TOTAL DOT DEFECTS	ACCEPTABLE LEVEL
Total bright or black dot defects of all types	5 or fewer

 Note

1. 1 or 2 adjacent sub pixel defects = 1 dot defect

6.2 Customer Care & Warranty

For warranty coverage information and additional support requirement valid for your region, please visit www.philips.com/support website for details. You may also contact your local Philips Customer Care Center number listed below.

7. Troubleshooting & FAQs

7.1 Troubleshooting

This page deals with problems that can be corrected by a user. If the problem still persists after you have tried these solutions, contact Philips customer service representative.

1 Common Problems

No Picture (Power LED not lit)

- Check the connectors. Make sure the USB cable is firmly connected to the monitor.
- Disconnect and reconnect the USB cable again.
- Check the condition of the USB cable. If the cable is frayed or damaged, replace the cable. If the connectors are soiled, wipe them with a clean cloth.

No Picture (The screen is blank, although the computer power is on)

- Make sure the USB cable is properly connected the computer.
- Make sure the computer is on and working. The computer may be in sleep or power-saving mode, or displaying a blank screen saver. Move the mouse to "wake up" the computer.

Picture blinking, unstable due to insufficient power supply

- Check 2 USB connectors are firmly connected to the laptop.
- 5V/3A AC to DC adaptor is used. Please refer to page 5 (AC to DC adaptor information) .

The picture "bounces" or moves in a wave-like pattern

- Move electrical devices that may cause electrical interference away from the monitor.

Cannot play DVDs using the Third-Party DVD player program

- Use the Media Player included in your operating system.

Visible signs of smoke or sparks

- Do not perform any troubleshooting steps
- Disconnect the monitor from mains power source immediately for safety
- Contact with Philips customer service representative immediately.

2 Imaging Problems

An "after-image", "burn-in" or "ghost image" remains after the power has been turned off.

- Uninterrupted display of still or static images over an extended period may cause "burn in", also known as "after-imaging" or "ghost imaging", on your screen. "Burn-in", "after-imaging", or "ghost imaging" is a well-known phenomenon in LCD panel technology. In most cases, the "burned in" or "after-imaging" or "ghost imaging" will disappear gradually over a period of time after the power has been switched off.
- Always activate a moving screen saver program when you leave your monitor unattended.
- Always activate a periodic screen refresh application if your LCD monitor will display unchanging static content.
- Failure to activate a screen saver; or a periodic screen refresh application may result in severe "burn-in" or "after-image" or "ghost image" symptoms will not disappear and cannot be repaired. The damage mentioned above is not covered under your warranty.

Image appears distorted. Text is fuzzy or blurred.

- Set the PC's display resolution to the same mode as monitor's recommended screen native resolution.

Green, red, blue, dark, and white dots appears on the screen

- The remaining dots are normal characteristic of the liquid crystal used in today's technology, Please refer the pixel policy for more detail.

For further assistance, refer to the Consumer Information Centers list and contact Philips customer service representative.

"after-imaging" or "ghost imaging" will disappear gradually over a period of time after the power has been switched off.

Always activate a moving screen saver program when you leave your monitor unattended.

Always activate a periodic screen refresh application if your LCD monitor will display unchanging static content.

7.2 General FAQs

Q1: Is the LCD screen resistant to scratches?

Ans.: In general it is recommended that the panel surface is not subjected to excessive shocks and is protected from sharp or blunt objects. When handling the monitor, make sure that there is no pressure or force applied to the panel surface side. This may affect your warranty conditions.

Q2: How should I clean the LCD surface?

Ans.: For normal cleaning, use a clean, soft cloth. For extensive cleaning, please use isopropyl alcohol. Do not use other solvents such as ethyl alcohol, ethanol, acetone, hexane, etc.

Q3: Are Philips LCD monitors Plug-and-Play?

Ans.: Yes, the monitors are Plug-and-Play compatible with Windows 7/Vista/XP

Q4: What is Image Sticking, or Image Burn-in, or After Image, or Ghost Image in LCD panels?

Ans.: Uninterrupted display of still or static images over an extended period may cause "burn in", also known as "after-imaging" or "ghost imaging", on your screen. "Burn-in", "after-imaging", or "ghost imaging" is a well-known phenomenon in LCD panel technology. In most cases, the "burned in" or

Warning

Failure to activate a screen saver, or a periodic screen refresh application may result in severe "burn-in" or "after-image" or "ghost image" symptoms will not disappear and cannot be repaired. The damage mentioned above is not covered under your warranty.

Q5: Why is my Display not showing sharp text, and is displaying jagged characters?

Ans.: Your LCD monitor works best at its native resolution of 1920 x 1080 @ 60 Hz. For best display, please use this resolution.

7.3 USB monitor FAQs

Q1: My monitor is not recognized by my laptop OS.

Ans.:

- Ensure that you have installed the supplied driver/ software bundled with your monitor.
- You can download latest "DisplayLink" driver from <http://www.displaylink.com/support/downloads.php>
- You may have to re-boot your laptop in order to recognize the USB monitor correctly.

Q2: My monitor does not display picture/ flickers/ shuts off and on

Ans.:

- The monitor requires minimum USB 2.0 port connection. It will not work with older USB 1.x standard.
- Please ensure that the both the connectors of the USB "Y" cable are connected to your laptop's USB ports so the monitor can draw enough power to activate.
- In rare instances, if your laptop's 2xUSB ports do not have enough power output for the monitor, in that case you may need to purchase an optional DC adaptor.

Philips part number	Description	Model of adaptor
080G L19 41DV1	CONSIGN ADAPTER 5V 15W CHINA	DSA-20PFE-05 FCH 050300
080G L19 41DV2	CONSIGN ADAPTER 5V/3A 15W USA	DSA-20PFE-05 FUS 050300
080G L19 41DV3	CONSIGN ADAPTER 5V 15W EUROPE	DSA-20PFE-05 FEU 050300

Please contact www.philips.com/support or Local Monitor Help Desk for the details.

Q3: My monitor does not start up with my stand alone desktop PC. I cannot see anything with Desktop PC.

Ans.: Please note that the USB monitor not designed to work with DOS yet. It is meant to be used as a "secondary display", therefore it must be used with a Laptop type of computer which has a permanent primary display attached to it. This is because USB monitor will display images only after the Windows login screen appears, as by then the monitor is recognized by the system.

Q4: Can I use my PC on Linux/ Apple system (systems other than Windows).

Ans.: Not at the moment.

Q5: I cannot find any adjustments on the monitor.

Ans.: As the monitor works directly from USB ports, it does not require any adjustments at all. It is fully plug and play.

Q6: I cannot find power on off button on the monitor.

Ans.: You do not require any power button as there is no direct power connection for the monitor. Once you shut off your laptop, or remove the USB connectors, the monitor will turn off completely.

Q7: Do I need to use USB 2.0 or USB 3.0 ports?

Ans.: You can use both technologies from the PC side. The monitor has USB 2.0 input.
