

MULTI VAPORÌ MV7.20

Model: 4207/10

Code: 00P420710AR0

EAN: 8003705109001

Multipurpose steam cleaner with refillable boiler for ceaseless, eco-friendly and deep-down cleaning of all home surfaces: the tank is removable and easy to fill, even using tap water. The steam jet is powerful and constant, thanks to 1400 Watts of power and 4 bars of pressure. To deal with stubborn stains, the MV7.20 has a detergent function, an innovative device that, thanks to a special dispenser on the nozzle, injects small amounts of detergent when needed, to maximise the deep-down cleaning effect of the steam, removing stubborn stains and seemingly unbeatable dirt. The detergent is dispensed, using a trigger, from a special reservoir that is easy to refill. Complete with on and steam ready lights, plus pressure gauge.
