"Really silent, extremely efficient and inexpensive"

The silent power supply for an economical computer - this is how the German online magazine Tech-Review entitles their test of the Straight Power E9 400 W. The editors praise the high efficiency, the extremely low noise, the voltage regulation and the long warranty period. Because there is "no comparable alternative" they give the Straight Power E9 a "very good" award.

Good overall package with an attractive price point

German online magazine Hardwareluxx is now among the few publications to test power supplies using a Chroma testing rig. As part of a roundup to kick off the new Chroma, they included a Straight Power E9 680 W CM and put it through the extensive test. be quiet! was the only one among the competitors not to receive negative feedback about their electrical noises. Also the Straight Power was mentioned to be even more silent than some semi passive power supplies.

be quiet! sponsors custom built PC case

be quiet! has always been a big fan of PC modding. For years, be quiet! has been involved in numerous projects and competitions to support high-end case mods and case constructions. Unfortunately less and less people are involved in this nice hobby. So be quiet! is always happy to find ambitious projects, where they can help. Just like the project called "Overdefined" by Belgian modder "wotevajjjj". Since this guy is studying product design, he is trying to build his very own aluminium PC case. be quiet! volunteered to contribute several 120 and 140 mm SilentWings 2 fans as well as a Straight Power E9 with 680 Watt and cable management to this project. The build process is being documented in British Overclock3D community.

Straight Power E9 400W at French GijFo

GijFo, the famous French green IT oriented web site, has tested the Straight Power E9 400W. The latest small gold model from be quiet! has easily obtained a great rating on all of the three key criteria, which are performance, price-quality-ratio and environmental awareness.

Link: <http://goo.gl/HWLst>

Nearly flawless impression

Even with the high sensitive and expensive testing station from Chroma over at PC-Max, the Straight Power E9 performed great. So in the end it deserved another editor's choice award!

Link: <http://goo.gl/IC9v5>

"All-round success"

In their latest issue 02/2012 German print magazine PC Games Hardware did another roundup for power supplies between 300 and 1300 watts with a special focus on efficiency. There was a Straight Power E9 with 580 watts and cable management among the contestants and it received another "Top-Produkt" award.

Link: <http://goo.gl/GySpC>

Straight Power E9 takes front rank in its class

German online magazine Au-Ja! is an honest partner to be quiet! and is always trying to keep up with the newest power supplies. So they got their hands on a Straight Power E9 with 580 watts and cable management and found it to be convincingly good, so it received and editor's choice award.

Link: <http://goo.gl/L8m2E>

Dexgo has nothing to complain about

German online magazine Dexgo also took the Straight Power E9 for a spin and they were not able to find anything they didn't like. Accordingly they gave away their gold award.

Link: <http://goo.gl/s515i>

Straight Power E9 leaves nearly nothing to be desired

The renowned German online magazine Technic3D is always a loyal partner to be quiet! and reviews most of their new products. Just like the Straight Power E9 with 480 watts and cable management, which received a gold and a value award for good performance at a decent price.

Link: <http://goo.gl/cMece>

"Every year again!"

German online magazine Hardwarelabs used their christmas holidays to check out the brandnew Straight Power E9 with 580 watts and cable management. As expected, it performed really good again and received an editor's choice award.

Link: <http://goo.gl/3byyR>

"One of the quietest power supplies we have ever tested!"

The international team from VR-Zone took a look at the new Straight Power E9 mit 580 watts and cable management. In the end they were pretty content with this product. It scored more than 9 points in nearly every sub category. After all it got a "Good Design" award as well as 9 out of 10 points overall.

Link: <http://goo.gl/zKBau>

Straight Power E9 gets price-performance award

German online magazine Allround-PC compared three power supplies in december, one of them being a Straight Power E9 with 580 watts. Other competitors were from NZXT and Antec. In the end, be quiet! got rewarded as a price-performance winner.

Link: <http://goo.gl/v5A8z>

Straight Power E9 gets good review in the USA, too

JonnyGuru is one of the most important publications when it comes to reviewing power supplies. It's always a big relief to get a decent conclusion from JonnyGuru. But Straight Power E9 680 W CM did more than decent and got rewarded as a recommendation and scored 9 out of 10 points!

Link: <http://goo.gl/Y6PYt>

Users seem to like Straight Power E9

be quiet! always tries to send out some early review samples to interested users, to receive direct and honest feedback about a new product. This is how the Straight Power E9 with 480 watts and cable management found its way to user "Philippus II" from the Hardwareluxx forums. He was very satisfied with the performance of this PSU and recommends it strongly!

Link: <http://goo.gl/zcHQa>

One of the best PSUs in the 400 W region

German online magazine PC-Experience used to test other be quiet! power supplies before, so they had a good reference to compare the new Straight Power E9. In the end they were really satisfied and handed out their technology award in gold.

Link: <http://goo.gl/hFbB4>

"One of the most impressive power supplies we have tested to date"

British editors from KitGuru got their hands on the brand new Straight Power generation from be quiet!. The 580 watt model with cable management performed impressive, especially regarding noise levels. So it got rewarded as "Worth buying" and scored 8 out of 10 points.

Link: <http://goo.gl/yj58f>

Straight Power E9 with top-notch efficiency

The new Straight Power E9 with 680 watts and cable management found its way to the U.S. magazine Hardware Secrets. They are widely known for very deep reaching technical tests. So, after they did their job, the E9 received a lot of appreciation as well as some critique.

Link: <http://goo.gl/Nyacl>

Straight Power in high end system

Intel just released the new Sandy Bridge Extreme processors. They are without a doubt the fastest consumer CPUs on the market. So German print magazine PC Games Hardware put together a nice system configuration inheriting this new chip. For power supply they choose another be quiet! product, the brand new E9 with 700 Watts to be precise. This means, that four out of five high end configurations from PCGH run with be quiet! PSUs.

Link: <http://goo.gl/GySpC>

Straight Power E9 kicks ass

The brand new Straight Power generation E9 got reviewed by Canadian reviewer 3DGameMan. He got his hands on two versions. The 680 Watt model with cable management, and the 700 Watt version without removable cables. He said both of them would kick ass, and gave away this award.
