M1i/28

High fidelity, premium quality. Wherever you go.

Philips Fidelio M1i combines the very best in sound and comfort for an authentic music experience on the move. Expertly engineered for superb noise isolation in a light yet sturdy design, enjoy true high definition sound wherever you go.

Benefits

Capture every detail

- Acoustically sealed construction keeps sound details in
- Acoustic closed-back architecture for best noise isolation
- Bass Reflex System for clear, dynamic and balanced bass
- Double-layered ear-shells engineered for sound precision
- High power neodymium drivers for true-to-original sound
- Speakers carefully tested for the best balance in sound
- Frequency response tuned to discerning listeners' preference

Designed for immersion

- Deluxe breathable ear pads and memory foam for optimal fit

Quality finish for enhanced performance

- Oxygen-free, fabric-lined cable ensures high quality signal
- Premium materials including aluminum and fine leathers

Equipped for convenience

- iPhone mic and remote control and pouch included

PHILIPS

Features

Acoustic seal

The acoustic seal is a specially designed ribbon lock that's built into the internal chamber to eliminate any unnecessary sound leakage and preserve sound details. The result is excellent bass extension.

Bass Reflex System (BRS)

The acoustic closed-back architecture features a Bass Reflex System that comprises ear-shells with strategically placed vents. These regulate the air pressure within the internal chamber providing the diaphragm with a controlled environment for optimal acoustic response. Working in conjunction with the acoustic seal capture, it isolates every natural sound detail and delivers precise and dynamic bass without compromising on sound clarity.

Double-layered ear-shells

The M1i's double-layered ear-shells are engineered to reduce resonance and to dampen vibration for genuinely precise and clean sound so you hear every

superb sound detail. The solid, layered construction ensures durability and comfort, making the M1i an ideal music companion for a long time to come.

High definition speakers

Each speaker driver is carefully hand picked, tuned and tested before being paired to ensure the most balanced natural sound. The 40mm drivers utilize high power neodymium magnets to deliver true high definition sound in a wide dynamic range, reproducing even the most minute details.

Tuned frequency response

Extensive research was done with discerning music-lovers to gain insight to their listening preferences - for example, the balance of sound characteristics that they favored. Our acoustics engineers then tuned the Fidelio M1i to account for all the minute details that affect how listeners discern sound, such as how the ear reflects sound and resonates in response. As a result, our M1i headphones are engineered to reproduce sound that is as faithful to the original recording as possible - including current recording styles.

Deluxe breathable ear pads

The materials used for the Fidelio M1i are carefully selected to ensure long-wearing comfort and enhanced sound performance. Deluxe breathable ear pads with memory foam are designed for optimal ergonomic fit. Not only does the foam mould itself perfectly to the shape of your ear, it also seals in bass sounds while keeping out ambient noise. This is designed with the outer cushion - using a balanced proportion of fabric and protein leather - to reduce ear surface pressure and heat build-up, so that the M1i feels and sounds excellent.

Specifications
