Highlights

Relaxing position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle, even when you are sitting up straight. This means you can sit more comfortably when pumping: no need to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping helps your milk to flow more easily.

Soft massage cushion

Our massage cushion has a soft, velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk

flow. The iconic petal cushion is designed to mimic baby suckling, intended to gently help stimulate let-down.

Easy on-the-go

The breast pump is small and lightweight, which means it is easy to store and transport, making pumping on the go more discreet.

Easy to set up, express and clean

Few separate parts and intuitive design. Easily express milk for your baby, anytime.

Includes our Natural bottle

The wide, breast-shaped teat promotes natural latch-on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Functions

No leaning forward: Sit in a comfortable position

Soft massage cushion: Gentle stimulation

* Clinically proven comfort: Tests carried out on 110 mothers showed a significant preference for Philips Avent vs. a leading competitor

* More comfort: 73% of 73 UK breastfeeding mothers agreed that this breast pump was more comfortable than their current pump (main market brands).

* Independent research has shown that there may be a link between stress levels and milk production. See www.philips.com/avent

* BPA-free breast pump: Only associated with the bottle and other parts that come into contact with breast milk. Following EU regulation, 10/2011
