Enjoy powerful home cinema with 3D Angled Speakers

Obsessed with Sound

Maximise your home cinema sound experience with these dynamic 3-Directional Angled Speakers! Play all of your favourite entertainment content, including 3D Blu-ray discs, on this innovative Philips HTB7530 home cinema system.

Great listening experience

- 1000 W RMS power delivers great sound for movies and music
- 3D Angled Speakers disperse sound evenly around the room
- DynamicSurround for a more immersive surround experience

Simply enjoy all your entertainment

- Full HD 3D Blu-ray for a truly immersive 3D movie experience
- CinemaPerfect HD for clearer and sharper video playback
- Dock included for convenient playback from your iPod/iPhone
- Built-in Wi-Fi to enjoy your connected media wirelessly
- Instant 2D to 3D conversion for a lifelike movie experience
- Internet radio to enjoy the world of online radio channels
- Turn your Smartphone into a remote for Philips AV products

Designed to enhance your cinema at home

- Wireless rear speakers option for clutter free placement

PHILIPS

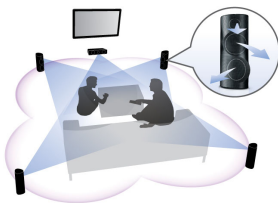

Highlights

CinemaPerfect HD

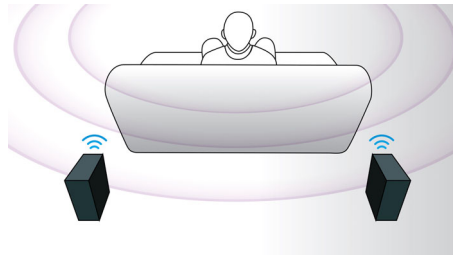

Philips' CinemaPerfect HD engine offers a new standard in clear and sharp video playback. This intelligent engine reduces noise and sharpens images to bring you higher quality video images than previously seen. Video noise reduction and super scaling work to reduce the noise that is produced when video is compressed into MPEG format. With improved colour processing, the engine produces sharp, deep images on screen.

3D Angled speakers

3D Angled Speakers feature angled drivers to deliver sound not only towards the front but also to the sides, creating a wider sweet spot so you can enjoy more immersive and cinematic surround sound.

Wireless rear speakers option

Wireless rear speakers give you scalability and mobility in speaker placement. Developed using interference-free technology, wireless speakers provide full surround sound without unsightly wire connections.

Instant 2D to 3D conversion

Enjoy 3D movie excitement in your home using your existing 2D movie collection. Instant 3D conversion uses the latest digital technology to analyse 2D video content to distinguish between foreground and background objects. This detail generates a depth map that converts normal 2D video formats into exciting 3D. Along with your compatible 3D TV, you are now ready to experience full HD 3D.

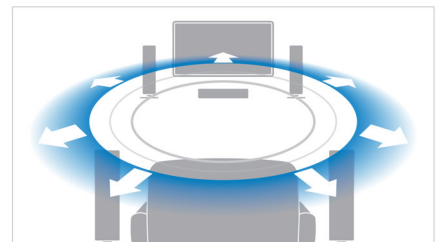

Philips MyRemote

The Philips MyRemote app lets you use your smartphone or tablet as a remote to control

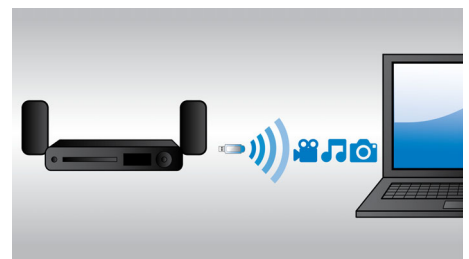

Philips AV products that are connected to your home Wi-Fi network, giving you instant control from anywhere in your home. It also comes with useful functions such as SimplyShare to connect and stream all entertainment wirelessly; MySound to customise your listening preferences; and SurroundMe to calibrate the best surround sound.

DynamicSurround

DynamicSurround employs highly advanced sound algorithms that faithfully replicate the sonic characteristics of the ideal full surround environment. This rewards listeners with an immersive, 7.1 system listening experience and by making the most of fewer speakers, the user's rooms are spared the clutter that comes with a 7.1 system — without sacrificing the surround sound experience.

Built-in Wi-Fi

Thanks to built-in Wi-Fi, by simply connecting your home theatre directly to your home network, you can experience a rich selection of popular online services. You can enjoy some of the best websites offering movies, pictures, infotainment and other online content tailored to fit your TV screen.

Specifications

Sound
