- Loader Type: 3 CD Carousel
- Number of Discs: 3
- Playback Media: CD, CD-R, CD-RW, MP3-CD
- Disc Playback Modes: Repeat/one/disk/program, Shuffle Play, 40-Track Programmable
- Number of decks: 1
- Cassette Deck Technology: Mechanical
- Cassette Playback Modes: Automatic Stop

Audio Recording

- Recording Media: Tape
- Tape Recording Enhancement: CD Synchro Start Recording

Tuner/Reception/Transmission

- Tuner Bands: MW, FM Stereo

Connectivity

- Audio Connections: RCA Aux in

- Headphone: 3.5 mm
- Microphone: Microphone socket
- Other connections: FM Antenna

Convenience

- Display Type: LCD
- Indications: DIM mode
- Karaoke: MIC volume
- Clock: On main display
- Alarms: CD Alarm, Radio Alarm, Tape alarm, Sleep timer

Accessories

- Remote control: 21-key
- User Manual: B-Portuguese
- Quick start guide: B-Portuguese
- Included accessories: MW loop antenna

Dimensions

- Set dimensions (W x H x D): 265 x 310 x 380 mm
- Speaker Width: 215 mm
- Speaker Height: 349 mm
- Speaker Depth: 180 mm
- Packaging dimensions (W x H x D): 570 x 496 x 413 mm
- Weight incl. Packaging: 13.4 kg

Power

- Power supply: 100-240VAC, 50/60Hz

Highlights

3-disc changer for MP3-CD

2-Way Bass Reflex System

2-Way Bass Reflex Speaker System for powerful sound

30 hours of MP3-CD music

MP3 stands for "MPEG 1 Audio layer-3". MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. MP3 has become the standard audio compression format used on the world wide web, allowing quick and easy audio file transfer.

3-step Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from level one to level three - at the touch of a button! You can customize the bass level that fits your style. Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

MAX Sound

MAX Sound technology produces an instant boost in bass, maximizing volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting bass and volume to maximum levels without distortion. The end result is a noticeable amplifying of both sound spectrum and volume and a potent audio boost that will add mileage to any music.

200W RMS

This system has 200W RMS total output power. RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.
