Highlights

Optimal skin contact

The laser performance gel is a vital part of Philips RéAura laser skin rejuvenation. It ensures that there is good contact between the RéAura device and the skin. Without using the gel, the skin may be treated unevenly and the treatment may be more uncomfortable.

Smooth gliding

The silky smooth texture of the gel makes the device glide smoothly over your skin.

Developed with Fraxel®

The laser performance gel has been specially formulated to be used with the Philips RéAura device. It has been developed with the makers of Fraxel® laser technology, based on their expertise in lasered skin.

Derm-tested and fragrance free

The formulation has been dermatologist-tested (n=204) and does not contain fragrances.

Hypoallergenic, non-comedogenic

Test results show that the formulation is hypoallergenic and that it is non comedogenic, meaning that it will not clog your pores.
