# Highlights

## 450 Joules

Prevent thousands of dollars of damage to your electronic devices.

## 15 amp circuit breaker

Safeguards against overburdening the surge protector by sensing when the connected equipment is drawing more electricity than the surge protector can handle. It then disconnects from the power, guarding against electrical fires.

## 6 outlets

Converts one outlet into six outlets allowing you to plug in multiple devices from one single AC outlet.

## 3 ft power cord

Provides power to the unit which can be 3 feet from the AC outlet.

## Protection indicators

LED lights let you know if your surge protector is functioning properly.
