Enrich your sound experience

- Total 100W RMS
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound

Start the day your way

- Wake-Up and Sleep Timer
- Digital tuning with 20 preset stations for extra convenience

PHILIPS

Highlights

Progressive Scan

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Specifications

Sound

- Output Power: 2x25W + 50W RMS / 1800W PMPO
- Sound Enhancement: Digital Sound Control 4 modes, Dynamic Bass Boost
- Sound System: Dolby Digital

Loudspeakers

- Main Speaker: 3" woofer
